OFFER

VALUABLE INFORMATION

TO PERSONS ENGAGED IN THE METAL AND BUILDING TRADES

An Artistic Booklet

Issued by the American Tin Plate Company, contains a brief history of iron and its application to roofing, and traces the manufacture of roofing tin from the early days to present time, also a full description of "How to Construct a Tin Roof;" and further, a great deal of very valuable tabulated information useful to every person interested in the building trades.

A Handsome Booklet

Issued by the American Sheet Steel Company, contains fine illustrations of the several Sheet Mills, also tables showing weights of sheets and bundle of standard sizes of Galvanized Sheets, Wood's Refined Sheets, Wood's Patent Planished Iron and Corrugated Sheets, net prices per pound and per square foot at given rate of discount, etc., etc.

Either or both Booklets will be sent free and postpaid to any interested person who will cut out and fill in the coupon and mail as indicated

FACTS and FIGURES

Remember the question is not only: *How much per gallon*, but *how far?*

The measure of paint value is not the price per gallon, but its covering capacity and wearing qualities.

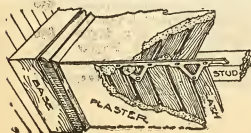

Dixon's Silica Graphite Paint is cheaper than other paints because it *Covers more surface per gallon, works easier* under the brush, *it lasts longer, it wears better*, therefore *Dixon's Silica Graphite Paint is more economical*. Made in four colors, one quality.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

C. J. Brooke, architect, 14 South Broad street, has completed plans and specifications and sent same to the owner, Michael Warter, for a two-and-a-half-story stone and frame dwelling at Wissinoming, Philadelphia. The owner will take bids.

Caldwell & Simons, architects, 1229 Walnut street, will send plans and specifications out this week for two houses for Dr. L. Diemer, to be built at Allegheny avenue and Jasper street. One will be two stories and the other three stories high. They will be built of brick and will have all modern improvements.

M. H. Dickinson, 2d, architect and engineer, Land Title Building, has forwarded to the building committee his plans, prepared in competition, for two new school houses to be built at Washington, Pa. Cost \$50,000 each. They will be two stories high and will be brick and will measure 106x64 feet each, and will contain 10 rooms each.

The plans of Robinson & Winkler, of Pittsburgh, Pa., have been selected for the new high school building to be erected at Altoona, Pa., at a cost of \$200,000. The plans of Carpenter & Croker, of Pittsburgh, received the second prize, and those of William L. Plack, of Philadelphia, the third prize.

Pugh & Hubbard, architects and engineers, Lippincott Building, are working on plans and specifications for a new residence to be built at Coatesville, Pa. It will be two-and-a-half stories high, with porch front and slate roof and will measure 30x42 feet. It will have best plumbing, gas and electric fixtures and all modern improvements. It will be ready for local builders to bid in about two weeks.

Albert W. Dilks, architect, Mutual Life Building, has completed plans and specifications and sent same out to builders for estimates for alterations and additions to the residence of Hunter Brooke, Esq., at 1005 Spruce street (details previously noted). Bids due May 16. The following builders are bidding: J. E. & A. L. Pennock, Stacey Reeves & Son, Thos. Little & Son and R. C. Ballinger & Co.

M. H. Dickinson, 2d, architect and engineer, Land Title Building, has completed plans and specifications for 84 houses to be built on Chew and Church streets, Germantown, for Jas. J. Allen, operative builder. They will be two stories high, porch front houses and will be built of fancy brick and cut stone, with all modern improvements. Only 28 of these will be built now, the balance will be erected later.

Walter F. Price, architect, 731 Walnut street, has completed plans for a three-story building to be erected at the northeast corner of Fifteenth and Walnut streets, for C. L. Dexter. It will measure 36x97 feet. The building will

be of fancy brownstone in the Italian style of architecture. The first floor will be store and the upper floors will be for bachelor apartments. It is expected that they will soon be sent out for bids.

Albert E. Westover, architect, Keith Building, has prepared plans and specifications and they have been approved by the building department for the new theatre to be built on 42d street near Eighth avenue, New York, for Oscar Hammerstein. The structure will be fireproof with a front of limestone, terra-cotta and brick, and will measure 68x98 feet. It will have a parquet and two balconies and will seat 995 persons. The interior will be finished in tile, marble and cherry. It is expected that estimates will be invited in a short while.

Henry D. Dagit, architect, 425 Chestnut street, has sent plans and specifications out to builders for the new edifice and rectory to be built at the southeast corner of Twenty-fourth and Lehigh avenue, for St. Columba Roman Catholic congregation. They will be built of Port Deposit stone and Indiana limestone trimmings (details previously noted). Melody & Keating, W. R. Dougherty, W. J. McShane, James McShane, P. McShane, Cornelius Kiely, Doyle & Doak, Jacob Myers & Son and Henderson & Co., are bidding. Bids due May 20.

Carl F. Berger, architect, South Penn Square Building, has sent plans and specifications out for estimates for a pair of houses for A. Meely, to be built at 3228 and 3230 North Seventeenth street. They will be three stories high, 16x68 feet, and will be built of brick and stone with porch fronts and tile roof (details previously noted). Bids due May 14. The following builders are bidding: Wayne Construction Company, F. C. Michaelson, B. Walker, H. P. Schneider, H. J. Schulz & Son and Philip Haibach.

Hale & Morse, Drexel Building, architects of the Carnegie Library to be erected at Broadway and Line streets, Camden, N. J., have sent plans and specifications to the following builders for the erection of same. Bids due May 16: Geo. L. Sipps, H. B. Shoemaker & Co., Doyle & Doak, John R. Wiggins & Co., J. E. & A. L. Pennock, Cramp & Co., Stacey Reeves & Son, Kendrick & Roberts, Inc., Henderson & Co., The Chas. McCaul Company, E. Tatterton, Turner & Stewart, Geo. Kachmann, F. T. Maguire, Frank J. Healey & Co., and Jno. S. Rodgers & Co.

There is a new home for the nurses to be built on the grounds of the Women's Hospital, at Twenty-second and North College avenue. The Board of Directors of this institution has invited D. J. O'Brien, Otkie & Ziegler, Morris & Vaux and C. E. Schermerhorn to prepare plans in competition for this home. It is to be four stories and basement high, of

brick or stone and will have every convenience and appointment. The first prize will be the commission for the building. The unsuccessful architects will receive \$25 each. All plans to be in the committee's hands by May 16, when it is expected that decision will be made by June 1.

J. R. Oorden, architect, 1003 Atlantic avenue, Atlantic City, N. J., is engaged on plans and specifications for a four-story brick cottage with slate roof to be erected in that city. The interior will contain all modern conveniences, such as open plumbing work, electric lights and heated by hot water. Will be ready for sub-bids in about two weeks.—He is also ready for estimates from general contractors for a two-and-a-half-story and basement frame and stone cottage to be erected in the same city. It will also contain modern conveniences and to be heated by hot water. Chas. Thompson, Philip Hannum and Josiah Conover, of the same city, are estimating. Bids due May 14.

Seymour & Paul Davis, architects, 907 Walnut street, are working on plans and specifications for a new bank and office building for the Easton Trust Company, of Easton, Pa. It will be five stories and basement high and will be built of stone. The first floor will be fitted up for banking purposes with vaults, partitions, etc. The upper floors will be offices. It will be wired for electricity, heated by steam with elevator and all modern appointments. They are also working on plans for an addition to the Y. M. C. A. Building at Coatesville, Pa. It will be two stories high of brick and will contain swimming pool, shower baths, toilets, locker room, directors' room, etc. It will be some time before working plans will be ready for the proposed structure.

Stearns & Castor, architects, Stephen Girard Building, have completed plans and specifications for alterations and additions to the factory of Thomas W. Wolstenholme Sons & Co., at Frankford avenue and Westmoreland street. The addition will be two stories high, of brick and slow burning construction, and will measure 200x47 feet. Bids due May 18. The following builders are bidding: A. Raymond Raff, Geo. C. Dietrich, Robt. Beatty & Bro., Scott & Krieble, Wm. R. Dougherty and The Chas. McCaul Company.—They have also completed plans for the new residence of Dr. Elmer E. Keiser, to be built at Tacony, Phila. It will be three stories and basement high, 45x39 feet, and will be built of brick with stone trimmings, and will have a slate roof. It will have hardwood on the interior and it will have 20 rooms with bath and all conveniences. Bids due May 18. The Chas. McCaul Company, Kendrick & Roberts, Inc., George Gray, John Rapp and John Davies & Son, builders, are bidding.

PHILADELPHIA, WED'Y, MAY 11, 1904

OBITUARY

Mr. Charles H. Reeves died at his residence, 2032 North Park avenue, on Thursday last, in his sixty-fifth year.

Mr. Reeves was a member of the firm of J. W. & C. W. Reeves, plasterers, and was born in the old Spring Garden district near Franklin and Wallace streets, on March 11, 1839. He was the founder of the Master Builders' Exchange, which organization has already passed suitable resolutions, deploring his death. Mr. Reeves was highly esteemed and had a host of warm and personal friends who feel his death keenly.

ARCHITECTS' NOTES

The old meter works property, at Twenty-second and Arch streets, has been bought by the city and will be remodeled and used as a house of detention for the Juvenile Court. Cost of improvement will be \$10,000. In a short while an architect will be appointed and the plans will be prepared and bids advertised for the proposed alterations.

Wm. Brotherick, architect, 905 Walnut street, is working on plans and specifications for 700 houses to be built at Altoona, Pa., for the Knickerbocker Contracting Company, of New York City. They will be two stories high and will measure about 16x65 feet, and will be constructed of brick with porch fronts and will have all modern and up-to-date appointments.

Duhring, Okie & Ziegler, architects, South Penn Square Building, are working on plans for a new church to be built at Greenwich, S. C. It will be constructed of frame with stone foundation, and will seat 450 persons. —Also they are working on plans for a frame bungalow to be built at the same place. Working plans will be sent to the local builders in a short while.

BUILDING AND REAL ESTATE NOTES

Hiram G. Hallinger, of Camden, N. J., is negotiating for the Cooper estate tract of that city, and if the deal is successful will erect 900 modern and up-to-date houses on the site. Doyle & Doak, builders, 1505 Sansom street, have filed bids for extensive alterations to the

office of the International Match Company, at Twenty-fifth and Wharton streets.

Wilson, Harris & Richards, architects and engineers, Drexel Building, have awarded the contract to Chas. Sinn & Co., of Rosemont, Pa., for grading roadways, walks, etc., for John H. Converse, Esq., at his country seat "Chetwynd," Rosemont, Pa.

It is reported that the site at Sixty-fourth street and Lansdowne avenue, Overbrook, belonging to the Orphan Society of Philadelphia, has been sold for \$500,000, and that the society has purchased a farm of 20 acres from Mr. Wm. S. Whitney, at Neither Providence, Delaware county, Pa., and will erect a number of suitable buildings for the orphanage.

Lynch Bros., builders, Lippincott Building, have plans posted for a four-story and basement store building, 18x54 feet, for Alex. Simpson, to be erected at the Southwest corner of Ninth and Cherry streets. It will be constructed of brick with the usual appointments. Plans by J. Elvin Jackson, architect, 719 Walnut street. Bids due May 16.

Kendrick & Roberts, Inc., builders, 1213 Walnut street, have plans posted for alterations and additions to 1315 Walnut street. Bids due May 14. Plans and specifications by Bailey & Bassett, architects, 421 Chestnut street. They also have plans posted for a rifle range to be built at League Island for the United States Navy. Bids due May 16.

Wm. Steele & Sons, builders, 1600 Arch street, has been awarded the contract to build the new edifice for the Third Reformed Presbyterian congregation at Franklin and Dauphin streets. It will be one-story and basement high, 60x65 feet, built of stone, brick and terra-cotta (details previously noted). Plans by E. V. Seeler, architect, Real Estate Building.

Wm. Provost, J. P. Thompson, H. Marion Zane, P. J. Hurley, F. E. Wallace and A. C. Lewis, builders, have filed bids with W. W. Potter, architect, 1012 Walnut street, for the new bank building for the Swarthmore National Bank, to be built at Swarthmore, Pa., according to his plans. It is expected that the contract will be awarded in a short while and work will proceed on the building.

A. Raymond Raff, builder, 1635 Thompson street, will build a new residence at 1700 Girard avenue. It will be three stories high, 18x67 feet, and will have a brownstone front. The interior will be in hardwood finish. It will be heated by hot water and will have all modern improvements. It will cost \$8,000.—He is also making interior alterations to the southeast corner of Thirteenth and Cherry streets, at a cost of \$9,000, for Chas. J. Gallagher.

P. J. Hurley, builder, 1216 Chancellor street, has filed bids for a new residence for Mr. H. W. Ferkler, to be built at East Lansdowne, Pa. It will be two-and-a-half stories high, 20x50 feet, of frame and stone. Plans by Charles J. Brooke, architect, 14 South Broad street. He has also filed bids with Watson & Huckel, architects, 1213 Walnut street, for a two-story brick and stone stable to be built at 308-10 South Juniper street, for George Allen, according to plans and specifications prepared by them.

McClintock & Weaver, R. M. Peterson, Samuel Krewson, F. C. Michaelson, Wanner & Stinson, P. J. McDevitt and Wm. R. Dougherty, builders, have filed bids for a handsome three-story stone and rough-cast residence to be built at Ashbourne, Pa., for Lester I. Dinger. It will measure 35x52 feet, and will have hardwood on the interior and will contain 20 rooms with all modern conveniences. Plans and specifications by Lawrence Visscher Boyd, architect, Harrison Building.

Jacob Myers & Co., Armstrong & Latta, Cramp & Co., H. B. Shoemaker & Co., have plans posted for extensive car and locomotive repair shops near Trenton, N. J., for the Pennsylvania Railroad Company. There will be six in number, as follows: Erecting and machine shop, blacksmith shop, wood working and paint and oil house, office and storehouse, laboratory and locker building. They will be one-story high and will be built of brick and slow burning. Bids due May 19. Plans by Joseph T. Richards, chief engineer.

Otto Domsen, electrical contractor, 2813 Germantown avenue, has been awarded the contracts for all electrical work on the following: Station for the Reading Railway, at Atlantic City, N. J.; factory building at Tenth and Hamilton streets, for the Chapman Decorative Company; residence for Mr. H. T. Greenwood, at Frankford; residence of Mr. Burd P. Evans, 63 West Seymour street, Germantown, and Mr. Louis E. Sweager, 61 West Seymour street, Germantown, and E. Pfauemper's ice cream saloon, corner Somerset and Germantown avenue.

Bids have been filed by Builders Henderson & Co., Cramp & Co., Wells Bros. & Co., of this city, for the store building to be located on Hopkins Place and Liberty street, Baltimore, Md., for the trustees of the Johns Hopkins University, of that city. It will be seven stories high, 90x200 feet, and will be built of brick with terra-cotta trimmings and will have slag roof, with every modern appointment and convenience, and is estimated to cost between \$300,000 and \$400,000. Wyatt & Nolting, architects, Builders' Exchange Building, Baltimore, Md., are the architects.

L. Marion Zane, builder, 1318 Chestnut street, has been awarded the following contracts: The erection of the handsome new residence for Rev. Joseph Krauskopf, at Pulaski avenue, Germantown. It will be three stories high and will be built of brick and stone. The interior will be in hardwood finish and will have every modern convenience. Plans and specifications by Louis C. Hickman, architect, 328 Chestnut street. —Also contract for the new residence at Glenside, Pa., for Mr. Wm. N. McCutcheon. It will be two-and-a-half stories high, of stone and porch front with slate roof and all up-to-date improvements. Plans by Isaac Pursell, architect, 110 South Fourth street. Also contract for alterations and additions to factory of Murphy & Mercer, 33 and 35 North Second street, according to plans and specifications of H. L. Reinhold, Jr., architect, 1004 Chestnut street. Also alterations and additions to 27 North Second street, for Mr. M. P. Lind.

FOR Plastering Walls and Ceilings J. B. KING & CO., No 1 Broadway, New York

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

The congregation of St. John's Protestant Episcopal church, at York, Pa., will erect a new parish house to cost \$25,000. No plans have been prepared.

Baker & Dallett, architects, Crozer Building, 1420 Chestnut street, have been commissioned to prepare plans and specifications for a three-story brick, stone and terra cotta bank and office building for the First National Bank, of Bristol, Tenn.

Spencer Roberts, architect, 1524 Chestnut street, has completed revised plans and specifications and sent same to W. R. Dougherty, builder, for alterations and addition to the residence of Mr. Wm. N. Gilbert, at 4726 Springfield avenue. Bids due May 23.

Duhring, Okie & Ziegler, architects, South Penn Square Building, are working on plans for two frame houses to be built at Riverside, N. J., for Mr. T. Zurbrugg. One will be three stories high and the other one two stories high. Work on these houses will be done by day work.

Koelle, Speth & Co., architects and engineers, 608 Chestnut street, are now ready for sub-bids on the new brewing plant for Joseph Baumgartner to be built at Sixth and Cheltenham, Camden, N. J. The proposed plant will be six stories high and will be built of brick and slow burning construction. Working plans can be seen at their office.

Hale & Morse, architects, Drexel Building, Philadelphia, and 21 East Saratoga street, Baltimore, Md., have completed plans for a hotel for the Safe Deposit & Trust Company, of that city, to be built at 104-06 West Fayette street, and to be occupied by Pat. Kerwin. It will be three stories high and will be fireproof and will contain all modern improvements.

Wilson, Harris & Richards, Drexel Building, architects and engineers, are working on plans for altering the Cherry street part of the Marks Brothers' old store into a manufacturing building. The proposed building will measure 30x130 feet and will be equipped with every modern and up-to-date equipment and appointment. It will be ready for bids in a short while.

At Chester, Pa., the Board of Education at a meeting held May 13th, adopted the plans of Architect Martin B. Bunyca for a four room addition to the Dewey School building at Third and Morton streets. The Building Committee, of which Mr. McDowell is the chairman, was authorized to advertise for bids and the contract will be awarded at the next meeting of the Board.

Architect A. P. Cooper, 704 First National Bank Building, Uniontown, Pa., has prepared plans for a dwelling to be erected on South Gallatin avenue, Uniontown, for Mr. Fuller Hoggatt, at a cost of \$10,000. The same archi-

tect and Architect Harry S. Bair, Westinghouse Building, Pittsburg, Pa., are completing plans for a three-story brick theatre to be erected at Schoonmaker and Fifth avenues, Monessen, Pa.

Architect M. B. Bean, Lansdale, Pa., has prepared plans for a three-story addition to the public school building at Jenkintown, Pa. It will be of Pompeian brick and terra-cotta and will contain twelve class rooms, a principal's and a directors' room and an assembly room, with stage, ante-room, etc. Thomas Little & Sons and F. L. Hoover & Sons will receive sub-bids until May 20th.

Watson & Huckel, architects, 1211 Walnut street, have completed plans and specifications and sent same out to builders for estimates for extensive alterations and additions to the residence at Thirteenth and Spruce streets for Mr. Charles Dougherty, owner. Plans provide for a new addition to be built in the rear and also on the side and general interior remodeling. Bids due May 25th. A. Raymond Raff, Thos. Little & Son, Geo. F. Payne & Co. and Mitchell Bros. have been invited to bid.

We are informed that four architects will prepare plans in competition for the buildings to be erected on a site of twenty acres recently bought near Wallingford, Delaware county, Pa., from Wm. S. Whitney, by the Orphan Asylum of Philadelphia, now located on Sixty-fourth street and Lansdowne avenue, Overbrook. The present site has been sold. The directors of the Orphan Asylum of Philadelphia are Mrs. John Markoe, 1630 Locust street; Mrs. S. T. Lowrie, Mrs. C. DeWitt Cuyler and Mrs. S. Dickson.

Bailey & Bassett, architects, 421 Chestnut street, have completed plans and specifications and sent same out for estimates for a new residence to be built at Haverford, Pa., for Prof. L. W. Reid. It will be two and a half stories high of stone and will measure 30x40 feet. It will have a porch front and side and will have every modern convenience. Bids due May 21.

The following builders are bidding: Grays Bros., Geo. C. Ristine, Wm. C. McDevitt, L. T. Edwards, John T. Worrell, Wm. C. Lower and Lewis Warner.

Albert W. Dilks, architect, Mutual Life Building, has completed plans and specifications and sent same out to builders for estimates for remodeling the residence of Mrs. George T. Baines, at 2200 Pine street. Plans provide for alterations and additions including bed room and bath room on second floor, hot water heating, plumbing, tile work, electric work, cut stone, etc. Bids due May 25th. The following are bidding: Chas. Gilpin, Stacey Reeves & Son, R. C. Ballinger & Co, Lewis Havens & Son and J. E. & A. L. Pennock.

Ballinger & Perot, architects and engineers, 1200 Chestnut street, have been commissioned

to prepare plans for a new power house, laundry and other improvements at the M. E. Hospital, at Broad and Wolf streets. The installation will include two 120 horse-power boilers, 75 K. W. dynamo direct connected to 115 horse-power engine, with wiring to light the present and the new buildings, additional water supply and improved heating systems. It is expected to have the plans ready for estimates within two weeks, and to have the work completed about October 1st.

Edwin F. Durang, architect, 1200 Chestnut street, has completed plans and specifications and sent same out to builders for the new south wing of St. Agnes' Hospital, at Broad and Mifflin streets. It will be four stories and basement high, 156x125 feet and will be built of stone and conform in style with the present buildings, bids due May 31st. The following builders have been invited to bid: Doyle & Doak, Melody & Keating, John McShane, A. Raymond Raff, Nolan Bros., Geo. Dietrich, Thomas Reilly and Geo. F. Payne Co. The electric wiring and steam heating is reserved. Mr. Durang is also working on plans for an isolating ward building to be built in the rear of the hospital.

Bids will be opened on June 7 in the reception room of the Executive Department, in the presence of the Board of Public Grounds and Buildings, Harrisburg, Pa., for the furnishing for the new Capitol at Harrisburg, including State chairs, mural and art painting, furniture, fitting, furnishings and decorations of wood work, stone, marble, bronze, mosaic glass and upholstery, bronze, metal, gas and electric fixtures, specially designed curtains, draperies and panels of Aubusson tapestry and silk brocades and carpets. Complete plans for all the special furniture and fittings will be shown to prospective bidders at the office of Architect Joseph M. Huston, Witherspoon Building, Philadelphia. At the same time supplies will be received at Harrisburg for other supplies, including typewriters and supplies, etc.

BUILDING AND REAL ESTATE NOTES

W. John Stevens, builder, Wynecote, Pa., has been awarded the contract to build the twin houses at Jenkintown, Pa., for Misses Margaret and Mary J. J. Nicholson. It will be two-and-a-half stories high, 30x52 feet, and will be built of brick and rough-cast. Plans and specifications by Heacock & Hokanson, architect, 931 Chestnut street.

Camden School Board of Education has asked City Council, of Camden, N. J., to issue \$125,000 in bonds, with which to buy land, erect new school houses and carry out other recommendations of the commission. It is said that the Board contemplates buying land for school purposes at Parkside near the New York Shipbuilding Company's yard.

BUILDING AND REAL ESTATE NOTES

The five-story building of the Camden Storage & Warehouse Company, of Camden, N. J., has been destroyed by fire. It is expected that as soon as the insurance is adjusted it will be rebuilt.

The old Morris homestead, on the Lazaretto road, has been sold to Michael D. Esposito, of this city, as a site for a new home. The building was erected by George Morris, a descendant of Robert Morris, the financier of the American Revolution.

Smith & Hardican, builders, Perry Building, have been awarded the contract for the alterations and additions to the Church Training and Deaconess' House, at 708-10 Spruce street, according to plans of Bailey & Bassett, architects, 421 Chestnut street.

Chief Endicott, of the Bureau of Yards and Docks, wants proposals until June 11th for a frame building for officers' quarters at League Island Navy Yard. The appropriation for this work is \$7050. Plans can be obtained from the commandant at the Navy Yard.

Oakes & Tyas, builders, 147 North Seventh street, have been awarded the contract to build the store and dwelling at 3431 Woodland avenue, for W. J. Gebbard. It will be three stories high, and will be built of brick with all modern improvements. Work will proceed at once.

John S. Miller, merchant tailor, of 1343 Passunk avenue, has purchased the property at 1208 South Broad street, for \$11,000. Mr. Miller will make extensive alterations and improvements to this property and will open up a first-class merchant tailor store about September 1.

John Gill and John R. Wiggins & Co., builders, have plans posted for extensive alterations and additions to the clubhouse for the A. C. Harmer Club, at 1130 Shackamaxon street. Bids due May 25. Plans and specifications by Joseph Huston, architect, Witherspoon Building.

Frank H. Rinker, builder, at Germantown, has been awarded the contract to build the stone billiard room addition to the residence of H. M. Sill, Esq., at School Lane, Germantown, according to plans prepared by Horace Wells Sellers, architect, Stephen Girard Building.

Edward Fay, builder, 2666 Richmond street,

has been awarded the contract to build the new store building at Sixth and South streets for M. Silverman & Sons. It will be three stories and basement high (details previously noted). Plans by C. E. Rahn, architect, 410 Walnut street.

F. E. Wallace, builder, De Long Building, Thirteenth and Chestnut streets, has been awarded the contract for interior alterations to 1909 Spruce street, for Dr. George M. Boyd, according to plans and specifications prepared by Bailey & Bassett, architects, 421 Chestnut street.

Harrison C. Rea, builder, 1815 Francis street, has been awarded the contract for the new Sunday-school building for the Linden Baptist congregation, to be built on Linden street, Camden, N. J. Plans and specifications by Duhring, Okie & Ziegler, architects, South Penn Square Building.

Bids have been filed with Watson & Huckel, architects, 1211 Walnut street, for alterations and improvements to the store and warehouse of Robinson & Crawford, at 20 South Front street, according to plans prepared by them. It is expected that the contract will be awarded in a few days.

Wm. R. Dougherty, Frank E. Wallace, Gray Bros., and Henry Wolfe, builders, have filed bids with Cope & Stewardson, architects, 320 Walnut street, for swimming pool and dressing rooms to be erected at Rosemond, Pa., for Robert Kelso Cassatt, according to plans prepared by them.

The Prospect Brewing Company has taken title to the property at 1620 North Eleventh street, from Adam Faust, for \$6,750. The lot has a frontage of 16 feet and a depth of 173 feet, and the site will be used with others to provide space for additional storage facilities for the company.

P. J. Hurley, builder, 1216 Chancellor street, has filed bids with J. Elvin Jackson, architect, 719 Walnut street, for the store property of Alex. Simpson, to be built at the southwest corner of Ninth and Cherry streets. It will be three-stories high, 18x54 feet, and will have all improvements.

Wm. R. Dougherty, H. Marion Zane, Thomas Seeds, Jr., and Harry Saunders, builders, have filed bids with Geo. N. Rehlfuss, architect, 1524 Chestnut street, for alterations and additions to the residence of Mr. Ulysses Mercur, at 224 South Fifteenth street, according to plans prepared by him.

John R. Wiggins & Co., Jacob Myers & Son, R. C. Ballinger & Co., Thomas M. Seeds, Jr., and Appleton & Burrell, builders, have filed bids with John T. Windrim, architect, 1107 Walnut street, for alterations and additions to the Saving Fund Society, at Germantown avenue and School Lane, Germantown.

The Chas. McCauley Company, to North Eleventh street, binders, will make extensive alterations and additions to the German-American Trust Company's building, at the northeast corner of Broad and Arch streets, according to plans and specifications of Brookie & Hastings, architects, 328 Chestnut street.

Wade & Bell, architect, 1414 South Penn Square Building, have awarded the contract to

M. P. Boyd, builder, Fifteenth street above Walnut street, for a three-story addition to the plant of the International Printing Company on Chestnut street between Second and Third streets. It will be built of brick and will measure 21x137 feet, with modern improvements.

Henderson & Co., builders, Heed Building, have been awarded the contract to build the Nurses' Home, at the southwest corner of Thirteenth and Wolf streets, for the Methodist Episcopal Hospital. It will be three stories high, 98x36 feet (details previously noted). Plans by Stearns & Castor, architects, Stephen Girard Building.

Lynch Bros., builders, Lippincott Building, have been awarded the contract to build the Sunday-school building for the Calvin Presbyterian congregation at Sixtieth and Master streets. It will be two stories high, of stone (details previously noted). Plans and specifications by Heacock & Hokanson, architects, 931 Chestnut street.

Wm. Steele & Sons, 1600 Arch street, have plans posted for three five-story and basement buildings to be erected at 41-43-45 Hopkins Place, Baltimore, Md., for the Bennett and McCulloh estate. The combined dimensions are 80x105 feet and will be built of brick and slow burning construction. They also have plans posted for a store building to be built at 30-32-34 Charles street, Baltimore, Md., for the Safe Deposit and Trust Company, of that city. It will be five stories and basement high, of brick and steel, with all the necessary appointments.

Kendrick & Roberts, Inc., builders, 1211 Walnut street, have filed bids for new warehouse for Mr. A. Boehm, to be built at 409 Exchange Place, Baltimore, Md. It will be four stories high, 21x53x20x57 feet, and will be built of brick and slow burning construction. Plans by Wyatt & Nolting, architects, of Baltimore, Md.—They also have plans posted from Sperry, York & Sawyer, architects, of Baltimore, Md., for a warehouse to be built at 26 and 28 Hanover street, that city. It will be five stories and basement high, 107x55 feet, and will be built of brick, stone and iron and will be fireproof. Bids due May 20.

H. Marion Zane, builder, 1318 Chestnut street, has been awarded the contract to build the new school house at Feasterville, Pa. It will be one-and-a-half stories high, 55x90 feet, will be built of stone, with slate roof. Plans by H. L. Reinhold, Jr., architect, 1004 Chestnut street.—He has also been awarded the contract to build the two store buildings at 506-08 Baltimore ave., for O. F. Roller and R. G. Leinroth. They will be constructed of brick, with all modern improvements.—He also has plans posted and is now ready for sub-bids on a new residence for Arthur P. Lewis, Esq., to be erected at Cynwyd, Pa. It will be two stories and attic high, and will be built of clap boards, with stone foundation and shingle roof. It will have a porch on front and will have all modern conveniences and appointments. The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the re-

sults far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

A WISE INVESTMENT

The question is not

What will it cost to paint?

but

What will it cost *not* to paint?

Paint is Protection and Beauty if you use the Best Paint

"Dixon's Silica-Graphite Paint"

is a wise investment because it gives the best protection for the greatest number of years at the least cost. It pays large dividends in satisfaction and *Best Results*. Made in four Colors, one quality.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

How to Make a Weatherproof Roof

The manufacture of M F and U. S. Eagle N M (new method) Roofing Terns is explained and described in our free booklet, **"A Fifty Year Roof,"** which we will send free to any address—even on a postcard request. This book also contains practical directions for making a weatherproof roof, and many formulas and tables of value to architects, roofers, builders and contractors.

MF Roofing Ternes

were more than half a century the best roofing material made in the world. Lately we have developed from it the wonderful

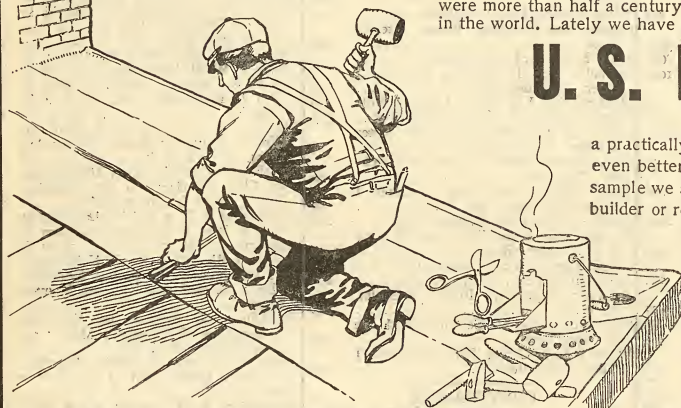

U. S. Eagle N M

(NEW METHOD)

a practically perfect terne, which will give even better service than MF. The free sample we send any architect, contractor, builder or roofer will demonstrate the value of this new product.

Our products are for sale
by all first-class whole-
sale metal houses.

ARCHITECTS' NOTES

Charles E. Oelschlagel, architect, Harrison Building, has completed plans and specifications and has invited bids for extensive alterations and additions to properties at 1255-57 South Seventeenth street, for John H. Cassidy & Bro. The building is to be used as a hardware and house-furnishing store.

We have been informed officially that work will begin on the proposed hospital for the insane at Lima, Pa., as soon as the plans have been approved by the State Board of Charities. Until this is done the name of the architect and other information will be withheld.

Baker & Dallett, architects, Crozer Building, have sent plans and specifications out to builders for estimates for alterations and additions to 627 Walnut street, for Frank H. Moss. Bids due May 27. The following builders are bidding: W. R. Dougherty, Thos. Little & Son, John Duncan, H. Hazlett, J. B. Thompson and Geo. L. Sipps.

Durhing, Okie & Ziegler, architects, South Penn Square Building, have completed plans and specifications and sent same out for estimates for two three-story stone houses to be erected on Upsal street, Germantown. They will have every modern and up-to-date improvement. The bids are due June 2. The following builders will be invited to bid: R. C. Ballinger & Co., Harrison C. Rea, John Owens, M. E. Hauser and Frank E. Wallace.

Heacock & Hokanson, architects, 931 Chestnut street, have completed revised plans and specifications and sent same out to builders for estimates for the twin house of R. M. Yahn and J. J. Foulkrod, to be built at Roxborough. It will measure 20x60 feet, and will be built of brick and stone. Bids due May 31. The following builders are bidding: Metzger & Wells, W. H. Eddleman & Son, J. W. Fritzinger & Son, F. B. Davis, King, Killough & Co., and F. L. Hoover & Son, Inc.

T. Frank Miller, architect, 1126 Walnut street, is working on plans for two three-story brick stores and dwellings, each to measure 16x51 feet, to be erected at 1014 and 1016 Locust street. They will be ready for bids in about two weeks' time.—He is also working on plans for an automobile house to be built at Twelfth street and Oak Lane, for L. D. Berger. It will be one-and-a-half stories high, of stone and galvanized iron and will measure 17x24 feet.

Geo. E. Savage, architect, Provident Building, is working on plans and specifications for the new Carnegie Library to be built at Vine-land, N. J. It will be one-story and basement high, 40x60 feet, and will be constructed of stone. The first floor will be devoted to library purposes, the basement will contain auditorium to seat 200 persons, toilet rooms, etc. It will

have every modern furnishing of a building of its kind. Working plans will be ready for bids in about one week's time.

Chas. W. Bolton and John J. Dull, associate architects, Witherspoon Building, have completed plans and specifications and sent same to the building committee for a new edifice to be built at Chester, Pa., for the Fifth Presbyterian congregation of that city. It will be one-story and basement high, and will measure 50x37 feet, and will be constructed of brick and stone and slate roof, with the usual church furnishings. It is expected that local builders will be invited to bid.

Brockie & Hastings, architects, 328 Chestnut street, have completed plans and specifications and sent same out to builders for alterations and additions to "Glenvale," at Villa Nova, Pa., for Mr. Theo. Spencer. Plans provide for general remodeling of the interior, also L-shaped addition, 25x40 feet, to be three stories high, of stone. J. M. Rossiter, J. D. Lengel, The Chas. McCaul Company, A. C. Tourison and Allison & Co., builders, are bidding. Bids due May 27.

Albert W. Dilks, architect, 1001 Chestnut street, has completed plans and specifications and sent same out to builders for estimates for addition and alterations to residence, stable and gardener's cottage, for W. H. Gibbons, Esq., at Ardmore, Pa. Plans provide for an additional story to be built at the rear of the residence and general interior remodeling. A new heating plant will be installed and new plumbing fixtures throughout the five bathrooms, etc. Bids due May 31. The following builders have been invited to bid: J. E. & A. L. Pennock, W. R. Dougherty, Frank Mahan and Jacob Myers & Sons.

Stearns & Castor, architects, Stephen Girard Building, have completed plans and specifications and sent same out to builders for estimates for the proposed new edifice to be erected at the northwest corner of Broad and Venango streets, for the St. Paul Reformed Episcopal congregation. The church will be Gothic in style of architecture, and will be built of stone and will measure 100x135 feet, and is estimated to cost about \$100,000. Bids due May 31. The following builders are bidding: A. Raymond Raff, Appleton & Burrell, Doyle & Doak, Robert Beatty, Wm. R. Dougherty, Henderson & Co., Stacey Reeves & Son, Geo. Watson & Son, Abel Bottoms and Geo. F. Payne & Co.

Prof. Laird, supervising architect of the new Carnegie Technical School to be built at Pittsburgh, Pa., has sent programmes to the following architects, who will prepare plans in competition: Hunt & Hunt, Boring & Tilton, Troubridge & Livingston, Palmer & Hornbostel, Lord & Hewitt, Ernest Flagg, of New

York; Rankin Kellogg & Crane, E. V. Seeler and Hale & Morse, of this city; C. Howard Walker, Cram, Goodhue & Ferguson, of Boston, Mass. This makes 17 so far that have been invited and it is expected that at least 25 more architects will be asked to prepare plans. The decision in regard to the successful architect will be announced some time after October 22. There will be nine prizes of \$1,000 each for designs next in merit.

Horace Trumbauer, architect, Land Title Building, has sent plans and specifications out to builders for estimates for a handsome new residence to be built at Elkins, Pa., for Charles E. Schmidt. It will be three stories high, 47x51 feet, and will be built of stone with Indiana limestone trimmings. It will have hardwood on the interior, tile baths and every modern convenience and appointment. The bids are due May 31, and A. Raymond Raff, W. S. Kohl, George Kessler, F. L. Hoover & Son, Inc., and D. W. Sperry, are bidding.—He is also working on plans and specifications and will send same out soon for estimates for a Colonial designed residence to be built at Langhorne, Pa., for H. B. Thomas, Esq. It will be two-and-a-half stories high, 46x32 feet, and will be built of local stone with Indiana limestone trimmings, and will have a green slate roof. It will have a porch on the front and side and will have every modern convenience such as hardwood finish, tile work, leaded glass windows, mantels, wired for electricity, etc.

Thomas Stephens, Masonic Temple Building, Camden, N. J., is receiving estimates for alterations and improvements to 310 and 312 Market street, Camden, for Mr. Joseph Lee. Plans provide for altering the first and second floors into offices and fitting up the third floor into a hall for social purposes.—He is also preparing plans for a new residence for Mr. George E. Taylor, to be built at 540 Cooper street, that city.—Also making plans for interior and exterior improvements to 832 Market street, same city. Plans provide for altering the present dwelling to meet the needs of a first-class store.—He is also receiving bids for a boardwalk to be 800 feet long and to be constructed at Anglesea, N. J., for Mr. H. Johnson.—He is also working on plans for a new cottage for L. J. McCormick, to be erected also at Anglesea, N. J. It will be three stories and basement high, and will be built of frame with brick foundation.—He is also taking bids for a new building to be erected at 525-27 Market street, Camden, N. J., for J. W. Jessup. It will be three stories high, 40x72 feet, and will be built of brick. The first and second floors will be offices, the third floor a music or dance hall with stage, etc.

A FISH DINNER FOR THE MASTER BUILDERS

Business is business, says the old adage, but the man who forgets that his machinery requires such lubrication as relaxation, conviviality and temporary forgetfulness of business cares afford will reap a harvest of jars and jerks if not absolute stoppage of the whole machine sooner or later.

It is a cardinal principle of the master builders of the Master Builders' Exchange of this city, to recognize and enforce the example of a "day off," and to let loose the other, if not the better, part of the business man, and in a wholesome, sensible freedom have a good time eating a good dinner unhampered by thoughts of strikes, the cost of material or the net gain or loss on contracts in hand, or any other stupid questions which are part of the daily lives of these rugged men who build cities.

Such an event occurred on Saturday last at Washington Park on the Delaware, and it was an occasion to be remembered. Baltimore builders were also there, and jokes and repartee; toasts and speeches; fat shad galore, as well as shad bones—and no man choked; and hilarity and good feeling prevailed in every direction.

ARCHITECTS' NOTES

Watson & Huckel, architects, 1211 Walnut street, have completed plans and specifications and sent same out to builders for estimates for alterations and additions to the residence of Walter E. Rex, at Chestnut Hill, Philadelphia. The following are bidding: W. J. Patterson, Thomas M. Seeds, Jr., Harry Saunders, G. S. Roth and Reynolds & Caldwell. Bids due May 31.

Jacob Naschold, architect, 504 Walnut street, has completed plans and specifications and sent same out to builders for estimates for altera-

tions and additions to the residence of W. B. Stahl, at 1727 Pine street. Bids due May 27. The following builders have been invited to bid: A. Raymond Raff, W. R. Dougherty, Stacey Reeves & Son, W. J. McShane and J. F. McCloskey.

Horace Trumbauer, architect, Land Title Building, has completed plans and specifications for alterations and additions to the clinical amphitheatre of the Hahnemann Medical College and Hospital, on Broad street above Race street. Bids due May 26. The following have been invited to bid: Geo. F. Payne & Co., Stacey Reeves & Son, Doyle & Doak and B. Ketchum & Son.

Bollinger & Perrot, architects and engineers, 1200 Chestnut street, have invited bids for the rebuilding of the part of the Victor Talking Machine Company's building, located on Front street, Camden, N. J., recently destroyed by fire. Plans provide for all windows to have wire glass and metal sash, fire walls and tin lined doors leading to the openings. All stairways to be brick enclosed and to be equipped with all up-to-date appointments.

BUILDING AND REAL ESTATE NOTES

Mr. Jno. T. Hecker, operative builder, with an office on the grounds will erect 98 two-story brick modern dwellings at Twenty-first and Indiana avenue, and is now ready for sub-bids.

Chas. Gilpin, builder, Pennsylvania Building, has been awarded the contract to erect the new plant for the Fintsch Compressing Company, at Williamsport, Pa. Contract price \$100,000 and will be similar to the plant at 13th and Spruce streets, erected by him for the same company.

Jacob Myers & Son, builders, Witherspoon Building, have been awarded the contract to make alterations and build additions to the Wills Eye Hospital, on Race street, above Eighteenth street, according to the plans and specifications prepared by John T. Windrim, architect, 1107 Walnut street. Work will be started at once.

D. W. Sperry, builder, 1305 Arch street, has been awarded the contract to build the new residence at Elkins Park, Pa., for Wm. G. Glenn. It will be two-and-a-half stories high and will be built of frame and stone, with all modern improvements. Plans and specifications prepared by McIlvaine & Roberts, architects, Land Title Building.

J. E. & A. L. Pennock, builders, 307 Walnut street, have been awarded the contract to build the new Free Carnegie Library at Broadway and Line streets, Camden, N. J. It will be two stories and basement high, of stone (details previously noted). Contract price \$70,000. Plans and specifications by Hale & Morse, architects, Drexel Building. Work will proceed at once.

Through a typographical error in our issue of May 18 it was announced that the plans and specifications for Mrs. Chas. F. Gummey's residence at Cliveden avenue east of Morton street, Germantown, were prepared by W. J. Gruhler, architect, of 110 South Fourth street. This is incorrect. It should have been Mantle J. Fielding, Jr., architect, of 110 South Fourth street.

A. Raymond Raff, Thomas Little & Son,

Geo. F. Payne & Co., Mitchell & Bros., W. R. Dougherty and MacTavish & Hazzard have filed bids with Watson & Huckel, architects, 1211 Walnut street, for transforming the dwellings at 1228-30-32 and 34 Spruce street, into a modern apartment house for Chas. B. Dougherty, according to plans prepared by them.

J. E. & A. L. Pennock, Doyle & Doak, Chas. Gilpin, John R. Wiggins & Co., King Killough and Armstrong & Latta, have submitted bids for rebuilding the Pennsylvania Warehouse and Safe Deposit Company's warehouse at Twenty-third and Race streets, recently destroyed by fire. The contract will be let very shortly and the work of rebuilding will start at once.

The Chas. McCaul Company, to North Eleventh street, have been awarded the contract to remodel the property at 2035 Chestnut street, for apartment house purposes for Miss Ann Lewis. The plans provide for rearranging the interior and the erection of a four-story addition 68x18 feet. It will be equipped with modern appointments. The estimated cost of the work is \$12,000.

R. C. Ballinger & Co., builders, 218 North Thirteenth street, have been awarded the contract to build the new residence at Drexel road and Lancaster avenue, Overbrook, for James Ramsey. It will be three stories high, 44x42, with a wing 21x29 feet. It will be constructed of stone and will cost about \$17,000. Plans by Duhring, Okie & Ziegler, architects, South Penn Square Building.

It is reported that the Pennsylvania Railroad will build a detention building at the Immigration Station, at Washington avenue wharf, this city. Plans have been prepared for some time by the company's architects, but there has been a delay in getting the site for the new building. It is expected that this will soon be settled and the work on the building be started at an early date.

Milton W. Young, F. L. Hoover & Sons, Inc., H. Marion Zane and D. W. Sperry, builders, have filed bids with Frank Seeburger, architect, 1408 Land Title Building, for a new residence to be built at Bala, Pa., for E. Seeburger. It will be two-and-a-half stories high and will be built of frame and stone. It will have a porch on front and will have all modern conveniences and appointments.

Cramp & Company, builders, 1421 Filbert street, and Baltimore, Md., have been awarded the contract to build the National Hotel at Baltimore, Md., for the Safe Deposit & Trust Company. It will be four stories high, 64x104 feet, and will be built of brick with stone and terra-cotta trimmings, and fireproof construction. Plans by Delano & Aldrich, architects, 9 East Forty-first street, Baltimore, Md.

P. J. McDevitt, builder, 1918 Cherry street, has been awarded the contract to build the handsome new residence at Ashbourne, Pa., for Lester O. Dingee. It will be three stories high, 35x52 feet, and will be built of stone and rough-cast, and will contain twenty rooms with all conveniences. Plans and specifications by Lawrence Visscher Boyd, architect, Harrison Building. Work will proceed at once.

DEAR SIR: I WILL CONTRACT to heat your residence, however large or small, with HOT WATER, and file a Trust Company's bond for ten times the cost, the same to be forfeited if I fail in any direction.

This means that there shall be more than enough radiation at the smallest possible cost for coal. No leaks, no mistakes, no annoyances of any kind. The boiler to be of the best make.

The responsibility all mine, and the cost no greater because of good work and material.

KING'S WINDSOR CEMENT

Elastic in its nature, can be applied with 25% less labor and has 12½% more covering capacity than any other similar material

FOR Plastering Walls and Ceilings J. B. KING & CO., No 1 Broadway, New York

The 20th Century Hot Air Radiator System of Heating

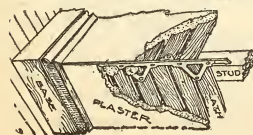

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

RUFUS, THE ROOFER, IN N. & G. TAY-
LOR CO.'S MAY "ARROW"

"The net experience of people who make and use roofs has decided that tin is the best roofing that can be made, and then it comes right down to a choice of tins.

"Maybe I haven't been saying enough lately about this idea of making a good roof while you are about it, because, you see, I have been so busy putting on good roofs. And this sort of reminds me of the time that Abner Markensfield got his first job. Abner was young and small of his age, but he got a place in a knitting factory to mind a machine. Abner minded his machine for about three weeks with an intentness which arrested the attention even of the foreman, who was used to new boys and acted according. Well, one day the foreman looked up and saw Abner standing by his desk.

"Well," he said, "what do you want?"

"I want a rise of pay," replied Abner.

"What do you get now?"

"Three dollars."

"What do you want?"

"Four dollars."

"Oh! So you think you are earning four dollars a week, do you?"

"Yes sir," replied Abner, "I do. I have been thinking so for several weeks, but I have been too busy to come and tell you."

"That's the way it is with me. I have been so busy putting on roofs for the kind of people that know they want 'Taylor Old Style' that I have not had time to say much to the people that are still waiting to argue about it."—Rufus the Roofer, in the May "Arrow."

BUILDING AND REAL ESTATE NOTES

John A. Gill, builder, Heed Building, has been awarded the contract to alter dwelling into a saloon and to have all the necessary and up-to-date appointments, situated at Broad and Moore streets, according to plans prepared by John T. Allen, architect, Betz Building.

In a very short time Cramp & Co., builders, of 1421 Filbert street, will start work on the thirteen-story annex, 22x100 feet, to the Arcade Building, at Fifteenth street and South Penn Square, which is to cost \$125,000. Plans by Furness & Evans, architects, 401 Chestnut street.

Metzger & Wells, builders, Heed Building, have filed bids for alterations and additions to the church and Sunday-school building of St. Philips' P. E. church, at Forty-second and Baltimore avenue, according to plans and specifications of Hewitt Bros., architects, Bullitt Building.

E. J. Kreitzburg and P. J. Hinley, builders, are bidding on a two-story factory, 195x50 feet, also an addition, 75x95 feet, for G. & W. Kolb, to be built at Meadow and Jackson streets. It will be constructed of brick and slow burning construction. Plans by H. D. Prettyman.

Estimates have been invited until June 21 by the Supervising Architect of the Treasury Department for plumbing, heating and ventilating apparatus, electric wiring, etc., in the work-rooms and under the terrace at the United States Mint, at Sixteenth and Spring Garden streets, Philadelphia.

FOR Plastering Walls and Ceilings

J. B. KING & CO., No 1 Broadway, New York

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the re-

sults far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

No transfer will be made of any certificate upon which the payment of any installment which is due and payable has not been made.

Stock certificates must be presented when payments are made in order to have same endorsed properly thereon.

By order of the Board of Directors.

A. V. R. COE, Secretary.

THE ROOF OF A HOUSE

Should be painted as well as the inside. The most attractive, most economical way to make a roof secure is to use—

"Dixon's Silica-Graphite Paint"

A paint ready for use, giving a finish that wears well and costs no more than any other good paint. Wears longer, spreads further and looks better longer.

Approved by architects, painters and consumers alike

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

At Washington, Pa., Architect John W. Vester has prepared plans for a new school building to be erected in the Seventh ward. The estimated cost is \$38,500.

Under the will of the late Mary J. Mills, \$10,000 has been left to All Saints Sisters of the Poor of St. Clements' church, to be applied to the purchase of a site at Sea Isle City, N. J., and the erection there on of a building to be known as the St. Clements' Seashore home. \$2,500 is also left for the purchase of bedding and kitchen utensils for the home.

Henry L. Reinhold, Jr., architect, 1004 Chestnut street, has prepared plans and specifications for two three-story houses to be erected at Llanerch, Pa. They will measure 32x30 feet, and will be built of brick and stone, with slate roof. They will be finished throughout in chestnut, with open fire-places, hot air heating, combination fixtures and modern plumbing.

Furness, Evans & Co., Cope & Stewardson, Field & Medary, architects, of this city, and Delano & Aldrich, of New York City, have been invited to prepare plans in competition for the new buildings for the Orphan Asylum at Philadelphia, to be erected on the 20-acre tract of land recently purchased by them near Wallingford, Pa. Competitive plans are due June 11.

At Atlantic City, N. J., the Board of Education has adopted the plans of Architect S. Hudson Vaughn, of Atlantic City, for a new school building to be erected in the First ward. It will be a three-story brick structure, with stone trimmings, or brick with terra-cotta, fine interior finish and modern conveniences. The cost will be \$32,000. The architect will receive bids for the work.

Ballinger & Perrot, architects and engineers, 1200 Chestnut street, have completed plans and specifications for an addition to the Standard Ice Manufacturing Plant, at Twenty-seventh and Lombard streets. It will be one-story high, 78x260 feet, and will have a truss roof. It will be constructed of brick and concrete. The following builders are bidding:

Geo. F. Payne & Co., H. Voight, Cramp & Co., Appleton & Burrell. Bids due June 10. Hale & Morse, architect, Drexel Building, have completed plans and specifications for 20 two and a half story houses for Harvey Gill. Ten to be erected at Cheltenham and ten to be built at Logan, Pa. They will be stone and frame, with porch fronts, and will measure 16x42 feet, and will have all modern improvements. D. W. Sperry, William Gayde, J. S. Cornell & Co., E. J. Kreitzburg and Lynch Bros., are bidding. Bids due June 10. C. E. Schermerhorn, 430 Walnut street, has completed drawings and specifications of a two-

story frame house to be built at Lansdowne, Pa., for Mr. Horbart M. Adams, and has invited the following contractors to estimate: Richard R. Roberts and W. H. Shuster, Lansdowne, Pa., and D. W. Sperry, of this city. The house will contain all modern improvements, such as hot water heating, gas lighting, plumbing, etc.

M. I. Kast, architect, 219 Market street, Harrisburg, Pa., is working on plans for a chapel for the Fifth Street M. E. congregation, containing the main Sunday-school room, classrooms and primary department. The building will be 45x101 feet, and have a finished basement and gallery. A seating capacity will be provided to accommodate about 900 persons: red brick, brownstone trimming, slate roof and plumbing fixtures. Bids will be asked for in a short while.

Wilson, Harris and Richards, architects and engineers, have sent plans and specifications out for altering the old Marks' store into a manufacturing building. This embraces 808-10-12-14 Cherry street (details previously noted). The following builders have been invited to bid: Alex. Chamblay, A. Raymond Raff, Geo. F. Payne & Co., Lewis Havens' Sons, John R. Wiggins & Co., Chas. Gilpin, D. A. McClelland, J. E. & A. L. Pennock and Robt. Killough. Bids due June 15.

D. K. Boyd, architect, Harrison Building, is working on plans for alterations and additions to the residence of Mrs. Elizabeth May Gill, at Radnor, Pa. The addition will be two-and-a-half stories high and will be built of frame and stone, with all modern improvements.—He is also working on plans and specifications for a Colonial house to be built near Wayne avenue, Germantown. It will be two-and-a-half stories high, 38x70 feet, and will be Colonial in design, with all modern improvements.

Broockie & Hastings, architects, 328 Chestnut street, have completed plans and specifications, and sent same out to builders for estimates for new laundry building two stories high, 86x50 feet, built of brick; also stable two stories high, 60x27 feet, also of brick, and isolating ward building, two stories high, 34x 44 feet, and will be built of brick and stone. The following builders have been invited to bid: W. R. Dougherty, The Chas. McCaul Company, Chas. Gilpin, Cramp & Co., and Frank E. Wallace. Bids due June 15.

The building committee of the Woman's Hospital of Philadelphia decided the competition for the nurses' home in favor of Architect C. E. Schermerhorn, 430 Walnut street. The design calls for a four-story and basement brick fireproof building, equipped in a most modern manner; the interior natural finish. Fire tower staircase is provided, also

driveway through building to the large hospital grounds from Seybert street. This building forms part of the handsome group of buildings and will be the finest and most modern appointed nurses' home in the country. The roof is planned to provide large roof garden. Plans will not be ready for bids for some time.

Watson & Huckel, architects, 1211 Walnut street, have completed plans and specifications and sent same out to builders for estimates for the First African church to be erected at the southwest corner of Sixteenth and Christian streets. It will be one-story and clerestory high, and will be built of stone and will measure 67x84 feet, and will have the usual church furnishings. Bids due June 13. The following builders are bidding: Thomas Seeds, Jr., H. B. Shoemaker & Co., James Johnston, John R. Wiggins & Co., F. S. Riggs and Kendrick & Roberts, Inc. The same firm have also completed plans and specifications for alterations and additions to the residence of Frank T. Williams, at Nineteenth and Venango streets. The owner will take bids.

Charles E. Oelschlaeger, architect, Harrison Building, has completed plans and specifications and sent same to the building committee who will take bids for the new Olivet Presbyterian church to be built at Moore Station, Pa. The building will measure 78x81 feet, and will be built of local stone with slate roof, hardwood finish and all modern church furnishings.—He is also working on plans and specifications and will invite bids about June 11 for a handsome three-story stone and frame residence to be built at Merchantville, N. J., for John Morgan, Esq. It will measure 58x40 feet and will contain 20 rooms, with all modern improvements. Plans will be sent out on Saturday, June 11.

Lindsay Johnson, architect, Harrison Building, plans have been accepted in competition by the building committee for the proposed new fire and engine house to be erected at Bryn Mawr, Pa., at a cost of \$23,000. It will be erected at the corner of Lancaster and Merion avenues, and will be two stories and basement high, 46x95 feet, and will be built of brick, terra-cotta trimmings and slate roof. It will be in the English Colonial design. The first floor will be engine house, locker rooms, stalls, etc. The second floor assembly rooms, billiard rooms, etc. It will be some time before working drawings are made.—He is also working on plans for a new residence for Mrs. Allen Dalley, to be built on Grays Lane opposite Merion Cricket Club, Haverford, Pa. It will be two-and-a-half stories high, of stone and will be Colonial in design. It will have every modern appointment and convenience, such as hardwood on the interior, tile baths, wired for electricity, steam heat, etc.

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

There is a movement on foot to purchase the old Jayne Mansion and grounds at the southeast corner of Nineteenth and Chestnut streets, and to erect a modern apartment house on the site.

Arnold H. Moses, architect, 136 South Fourth street, will send plans out soon for bids for a new Baptist church to be erected at Merchantville, N. J. It is estimated to cost about \$15,000.

By the will of the late Mr. John L. Devereux \$35,000 was left to erect a Methodist Episcopal church at the northeast corner of Twenty-sixth street and Allegheny avenue, as a memorial to his sister, Annie E. Devereux.

J. R. Ogden, architect, 1003 Atlantic avenue, Atlantic City, N. J., is now ready for bids for the two-story, attic and basement cottage for Mr. Beriah Mathes to be built at 29 South Illinois avenue, that city (details previously noted). Bids due June 20.

Architect W. D. Hill, Pottsville, Pa., has prepared plans for a brick church to be erected for St. John's Greek Catholic congregation, at Lansford, Pa. Bids for its construction will be received until June 18, 1904, by the Rev. Orestes Zlocky and the trustees.

Architect Charles P. Baldwin, 45 Clinton street, Newark, N. J., has prepared plans for a row of seven three-story dwellings, at Elizabeth avenue and Pointer street. They will be of brick and brownstone, fine interior finish, steam heat, modern conveniences. Mr. Thomas Pruitt is the owner.

H. L. Reinhold, Jr., architect, 1004 Chestnut street, has completed plans and specifications for alterations and additions to the Hotel Lafayette, at Conshohocken, Pa. Bids due June 22. The following are bidding: H. Marion Zane, A. Raymond Raff, Frank Heavner, Wm. Shoffner, Richard Kearns, Martin Alexander and H. T. Hallowell.

At Jersey City, N. J., the Board of Education will receive bids at a meeting to be held June 23 for the construction of the proposed new high school, for which an appropriation of \$350,000 has been made. Architect Rowland, Jersey City, has finished preliminary plans for alterations to a number of public school buildings. The cost of the extensions and improvements will be \$100,000.

Wilson, Harris & Richards, architects and engineers, Drexel Building, have completed revised plans and specifications for the proposed new house for the Hebrew Literature Society, to be built at 310 Catharine street. It will be three stories high, of brick. Bids due June 17. The following builders have been invited to bid: Chas. Gilpin, J. E. & A. L. Pennock, B. Quinter and John R. Wiggins & Co.

Horace Trumbauer, architect, Land Title Building, has completed plans and specifica-

tions for a casino to be built for Mr. Geo. W. Elkins, at Elkins, Pa. It will be one-story high, of half timber, stone and pebble-dashed, and will measure 51x52 feet. It will contain billiard room, shuffleboard, etc. H. Marion Zane, D. W. Sperry, M. W. Young, H. Slocum and F. L. Michelson have submitted bids. McIlvaine & Roberts, architects, Land Title Building, have plans in the course of preparation for two Colonial designed residences to be built at Ardmore, Pa., for Albert L. and Henry Register. They will be three stories high. One will be constructed of stone and will measure 30x50 feet. The other will be built of brick and will measure 35x70 feet. They will have porches on the front and two sides. The interior will be in hardwood finish, with open fireplace and modern appointments.

Henry L. Reinhold, Jr., 1004 Chestnut street, has completed plans and specifications and sent same out to builders for estimates for a new residence for L. C. Reynolds to be built at Ardmore, Pa. It will be two-and-a-half stories high, stone and half timber, and rough-cast, and will measure 45x50 feet. It will have hardwood on the interior, with open fireplace, etc. Bids due June 20. The following are bidding: Frank Mahan, J. D. Lengle, F. B. Davis, Gray Bros., Joseph Dyson, D. W. Sperry and John Worrel.

Stearns & Castor, architects, Stephen Girard Building, have sent revised plans and specifications out for the erection of the new edifice for the St. Paul Reformed Episcopal congregation, to be built at Broad and Venango streets. It will be built of stone and will measure 100x135 feet (details previously noted). The following are estimating: Doyle & Doak, W. R. Dougherty, Appleton & Burrell, A. Raymond Raff, Henderson & Co., J. R. Wiggins & Co., Burd P. Evans, W. W. Rea & Son and Kendrick & Roberts, Inc. Bids due June 23.

C. E. Schermerhorn, 430 Walnut street, architect, has prepared plans for eight three-story, fourteen-room, stone twin houses with detached porches, to be erected on McGowan avenue, Mt. Airy, Philadelphia, for Mr. S. H. Morrison. The houses will be most elaborately finished with large reception hall, reception room, open stairs, dining room, pantry and laundry on first floor, with each of the upper floors three rooms and bath. Interior finished in oak, with hardwood floors and three large open fireplaces. Owner is taking bids at 137 South Seventh street. The operation will cost \$70,000.

Watson & Huckel, architects, 1211 Walnut street, are working on plans for a store building to be built at Bridgeton, N. J., for H. Call and Samuel A. Hitchner. It will be three stories high, of brick, with all modern improvements. Local builders will be invited to bid. They are also working on plans for the remodeling of the approach to the residence of Mr.

Joseph Greer, on Thirty-third street above Diamond street. Work will consist of granite steps and coping, etc. They also inform us that the contract for alterations and improvements to the southeast corner of Thirteenth and Spruce streets, for Mr. Chas. Dougherty, has been deferred to next fall.

Brookie & Hastings, architects, 328 Chestnut street, have completed plans and specifications and sent same out for estimates for the modern new hospital building to be erected at Thirty-third and Lancaster avenue, for the Rush Hospital. It will be four stories, basement and sub-basement high, 154x58 feet, and will be constructed of stone, brick and terra-cotta, and will be fireproof throughout. It will be equipped with every modern device for the treatment of tuberculosis. Bids due June 18. The following builders have been invited to bid: Geo. L. Sipps, Wm. R. Dougherty, Appleton & Burrell, E. Gilbert & Co., Chas. Gilpin and the Philadelphia Contracting Company.

BUILDING AND REAL ESTATE NOTES

J. S. Rogers, Stanwick, N. J., has the contract for a summer home to be erected at Seaside Park, N. J., for Mrs. Edward Strawbridge.

Lynch Bros., and Kendrick & Roberts, Inc., builders, are bidding on a one-story brick and steel building, 228x58 feet, for an assembling shop; also on a two-story brick and steel storehouse, 211x59 feet, at the Frankford Arsenal. Bids due June 20.

Wm. H. Burns, builder, at West Chester, Pa., has been awarded the contract to erect the stone barn and stable on the grounds of the convent at Villa Maria, at West Chester, according to plans and specifications of Watson & Huckel, architects, 1211 Walnut street.

Henderson & Co., builders, Heed Building, have been awarded the contract to build the new power house on the grounds of the Methodist Episcopal Hospital at Thirteenth and Wolf streets (details previously noted). Plans and specifications by Ballinger & Perrot, architects and engineers, 1200 Chestnut street.

Scott & Kriebel, builders, Mutual Life Building, have been awarded the contract to build the Colonial designed residence on West Harvey street, Germantown, Pa., for Thomas W. Barlow. It will be three stories high, of stone, with all appointments. Plans by Watson & Huckel, architects, 1211 Walnut street.

Charles Thompson, builder, of Atlantic City, N. J., has been awarded the contract to build the new cottage at 15 South Illinois avenue, for Mr. Charles Mathes (details previously noted). Plans and specifications were prepared by J. R. Ogden, architect, 1003 Atlantic avenue, that city. Work will proceed at once.

A BED OF ROSES FOR THE OWNERS OF ROOFS

The roofing firm of Gara, McGinley & Co., 23 South Seventeenth street, this city, are addressing property owners in the interest of a method for the protection and caring for roofs, which was adopted twenty years ago.

The prospectus provides for a periodical practical examination of each roof separately without cost of any kind to the owners. If repairs or painting are needed, or weak spots are detected, the facts are scheduled and presented to the owners without elaboration; and if after consultation the owner determines the work necessary, it is then done at as small cost as possible consistent with good work.

The method commends itself to owners because of the fact that the roof is being cared for by a competent concern or firm, for when it is understood that the owners of buildings, are as a rule the most indifferent, reckless as well as disinterested people in the world as to the condition of their roofs up to the leaking point, while the roof, if properly cared for, would have never leaked. These owners are apt to curse the poor material or perhaps the man who puts the roof on, but their own neglect and indifference never occurs to them.

It was the wise virgins of the Bible who took oil for their lamps—wise roof owners are reaching out for the Gara, McGinley & Co. way of avoiding trouble and saving unnecessary expense.

BUILDING AND REAL ESTATE NOTES

The property at 14 North Eleventh street will be altered into a first-class restaurant. Plans are now being prepared and bids will be invited in a short while.

Doyle & Doak, builders, 1509 Sansom street, have been awarded the contract to build the clinical amphitheatre of the Hahnemann Medical College and Hospital on Broad street above Race street. Plans and specifications by Horace Trumbauer, architect, Land Title Building.

P. J. Hurley, builder, 1216 Chancery street, has been awarded the contract to build the new church at Allegheny avenue and Hurley street, for the Evangelical Lutheran Church of Our Saviour. It will be constructed of stone, with

all the usual church furnishings. The plans and specifications by T. Frank Miller, architect, 1126 Walnut street.

John Schmunk, owner and builder, 612 Cambria street, has broke ground for an operation of thirty-one two-story brick dwellings and two stores and dwellings, to be built in the Thirty-third ward, on the following streets: Reese, Luzerne, Lycoming, and will measure 15x16 feet, 14x37 feet. They will have all modern improvements and the operation will cost \$40,000.

Thomas B. Watson, owner, with office on the grounds, will erect an operation of nineteen two-story brick dwellings and two two-story brick stores and dwellings, in the Twenty-seventh ward. They will be erected on the following streets: Sickles and Market, Conestoga and Market, Yewdall and Fifty-fourth. They will measure 16x55 feet, and 16x34 feet, and will have all up-to-date conveniences. This operation will cost about \$46,000.

John McConaghy, Jr., of 1001 Chestnut street, will erect an operation of 30 houses at Sixty-third and Vine streets. They will be two and three stories high, of brick and stone, with porch fronts, and will measure 16x55 feet, and 16x50 feet. They will have all modern and up-to-date improvements. S. Casals & Co., builders, Lippincott Building, are estimating, and the bids are due June 20.

Foulkrod, Jr., to be built at Roxborough, Philadelphia. It will be three stories high, of stone and frame, and will have all modern and up-to-date appointments (details previously noted). Plans and specifications by Heacock & Hokanson, architects, 931 Chestnut street.

Michael F. Lawler, builder, of Norristown, Pa., has been awarded the contract to erect the public school on Sandy street, Norristown, Pa. It will be two stories high, of brick and stone, and will measure 121x66 feet, with a slate roof. The interior will be finished with hardwood and metal lath. It will have eleven classrooms, two teachers' rooms and toilets. It will be heated by steam. Plans and specifications by Newman & Harris, architects, Land Title Building.

Oakes & Tyas, builders, 146 North Seventh street, have been awarded the contract for extensive alterations and additions to 1315 Walnut street, for Hale & Kilburn. Plans provide for a new front of marble and terra-cotta. The building of an addition to the rear, of brick, three stories high, and general remodeling of the interior. It is the intention of the firm to open a retail showroom as soon as the alterations are completed. The plans and specifications were prepared by Bailey & Bassett, architects, 421 Chestnut street.

The Board of Education, Jersey City, N. J., will receive bids until June 23 for the erection of a new school building at Palisade and Newark avenue. Separate bids for masonry, plumbing, heating and electric work, carpentering, ventilating or a lump bid for the entire work. James J. Wiseman, secretary of board.

Metzger & Wells, builders, Heed Building, have been awarded the contract to make alterations and additions to St. Philip's P. E. church, at Forty-second and Baltimore avenue, according to plans prepared by Hewett Bros., architects, Bullitt Building.

Wm. R. Dougherty, builder, 1604 Sansom street, has filed bids for alterations and addition to administration building for the Home for Consumptives, at Chestnut Hill, according to plans of Furness Evans & Co.; also have plans posted for alterations and addition to 523 South Second street, for John W. Murgatrov. Plans by C. E. Rahn, 410 Walnut street. Bids due June 18; also have plans posted from the same architect for a new building to be built at Fifty-fifth and Vine streets, for Jos M. Rittenhouse. It will be three stories high, of brick and stone, all modern improvements.

Lynch Bros., Lippincott Building, builders, have plans posted for a new residence to be built at Lansdowne, Pa., for Henry E. Johnson, Esq. It will be three stories high, 68x63 feet, and will be built of stone, plaster and half timber. It will have all modern and up-to-date appointments. Bids due June 17. Plans and specifications by Werner Trumbower, architect, 1511 Sansom street. The same firm have been awarded the contract to build the new edifice for the St. John R. C. congregation at Collingswood, N. J. It will measure 10x75 feet, and will be built of frame and shingle on stone foundation. The interior will be in hardwood finish. It will cost about \$5,000. The plans are by W. B. Farlow, architect.

Doyle & Doak, builders, 1509 Sansom street, have filed bids for a dining hall and dormitory building for the Pennsylvania State College, at State College, Pa. It will be four stories and basement, 138x103 feet, and will be built of stone, with the usual appointments. Plans by Paul & Seymour Davis, architects, 907 Walnut street.—They also have filed bids for a two-story and basement mill, measuring 50x85 feet, of brick and slow burning construction, to be erected on south side of Walnut street, Shamokin, Pa., for W. F. Taubel.—They have also filed bids for a two-story and basement mill, 45x100 feet, of slow burning construction, to be built at Tamagua, Pa., for the same party. Plans and specifications for both mills were prepared by W. N. Jury, Architect, at Shamokin, Pa.

Chas. Gilpin, builder, Pennsylvania Building, has been awarded the contract to build the Commercial Building for John S. Hayes, 505 East Baltimore street, Baltimore, Md. It will be three stories high, 25x35 feet, and will be built of brick, with all modern improvements. He has also been awarded the contract to build the new Lyric Theatre for Charles B. Dillingham, on the site of the old Winter Circus, at the northeast corner of Broad and Cherry streets. The plans provide for a building of fireproof construction, with a facade on Broad street, and a large entrance lobby on the corner. The interior arrangement will be patterned after the new Amsterdam Theatre in New York. The plans and specifications have been prepared by John T. Windrim, associated with J. B. McElfatrick & Son, architects, of New York.

KING'S WINDSOR CEMENT

FOR Plastering Walls and Ceilings

Elastic in its nature, can be applied with 25% less labor and has 12½% more covering capacity than any other similar material

J. B. KING & CO., No 1 Broadway, New York

The 20th Century Hot Air Radiator System of Heating

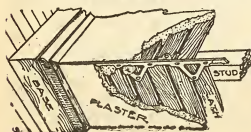

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior.

We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

C. C. Zantinger, architect, has moved from 267 South Fourth street, to the first floor of 251 South Fourth street.

Clyde S. Adams, architect, has moved from 1202 Locust street, to the ninth floor of the Mutual Life Building, 1001 Chestnut street.

At Reading, Pa., Architect M. M. Dreibellis, 546 Court street, has prepared plans for a dwelling to be erected at Hamburg, Pa., for Mr. Charles D. Barkey.

At Lansdale, Pa., Architect M. B. Bean has prepared plans for a two-and-a-half-story brick, frame and shingle dwelling to be erected for Mr. Gottlieb Schmid. Tile work, mantels, plate and leaded glass, modern conveniences.

At Homestead, Pa., Architect D. S. Piatt has prepared plans for a brick convent, school and parish house to be erected at Library Place and Ninth avenue, Munhall, Pa., for St. Michael's Slavonic Catholic congregation. Cost, \$15,000.

Thomas Cressey, 800 Broad street, Newark, N. J., has prepared two sets of plans for a building to be erected by the Board of Trade. One calls for a ten-story building to cost about \$180,000, the other plan calls for a four-story building to cost \$50,000.

W. W. Potter, architect, 1012 Walnut street, is working on plans and specifications and will send same out to builders for estimates about June 23 for alterations and additions to the residence of Dr. T. Melor Tyson, at 332 South Fifteenth street. Plans provide for new bay window, new baths, extension to office, hardwood floors, etc.

At Newark, N. J., the plans of Welch, Smith & Provot, of 11 East Forty-second street, New York City, have been accepted by the Building committee of the Y. M. C. A. for a new building to be erected at Church and Ellsworth street, Newark, at a cost of \$60,000. Bids will be asked. Mr. Edward Barbour is chairman of building committee.

Wilson, Harris & Richards, architects and engineers, Drexel Building, have completed plans and specifications and invited estimates for alterations and additions to 707 North Broad street, for the Journeymen Bricklayers Protective Beneficial Association of Philadelphia. Bids due July 1. Alex. Chambley, Melroy & Keating, J. McCauley Bros., H. C. Roydhouse and Robert Stutholme are bidding.

Henry L. Reinhold, Jr., architect, 1004 Chestnut street, has completed plans and sent same out to builders for estimates for four houses to be erected at Llanerch, Pa., for A. Merritt Taylor. They will be two-and-a-half stories high, of brick and shingle, with all improvements. Bids due June 28. The following are bidding: Jacob Myers & Son, Milton W. Young, John R. Wiggins & Co.,

George Davis, H. P. Wolfe, Joseph Dyson, Frank Mahan, McConaghy Brothers and Kendrick & Roberts, Inc.

Francis A. Gugert, architect, Wayne Title Building, Wayne, Pa., has completed plans and is taking estimates for extensive interior and exterior alterations to 1808 Green street, for Dr. Stone. He has also awarded the contract to J. Morris Rossiter, builder, to remodel the stable of W. N. Wilbur, at Devon, Pa. Plans call for a new coach house, cleaning room, harness room, saddle room, office, bath and sleeping rooms for help.

Hale & Morse, architects, Drexel Building and New York City, have been commissioned to prepare plans for an office building for the Fore River Shipbuilding Company, to be built at Quincy, Mass. It will be three stories high, of brick and stone and will cost about \$40,000. They also inform us that the work on the erection of the handsome new high school to be erected at Plainfield, N. J., at a cost of \$12,500 will be started next week.

Francis A. Gugert and Frank A. Rommel, associate architects, 1524 Chestnut street, have completed plans and specifications and sent same out to builders for the new building for the Phi Kappa Psi Fraternity, to be built at 3641 Locust street. It will be four stories and basement high, 38x90 feet, and will be built of brick, trimmed with stone, with all up-to-date improvements. Bids due June 25. The following are bidding: Charles Gilpin, John R. Wiggins & Co., Thomas Seeds, Jr. and W. R. Dougherty.

Duhring, Okie & Ziegler, architects, South Penn Square Building, have sent plans out to builders for estimates on a new building for the Galilee Mission to be built at Vine and Darien streets. It will be four stories and basement high, 32x85 feet, and will be built of brick and stone. Bids due June 24. The following are bidding: John R. Wiggins & Co., Wm. R. Dougherty, E. S. Riggs, A. Whitehead, Smith & Hardican Company, J. N. Thompson, S. J. Wray, H. C. Rea, Philadelphia Contracting Company, Kendrick & Roberts, Inc., and John Davies & Son.

Ralph E. White & Co., architects and engineers, Pennsylvania Building, have sent plans out to builders for a carriage house and stable to be built at Narberth, Pa., for John Donohue. It will be two stories high. The carriage house will be built of brick and the stable frame, with shingle roof. It will measure over all 85x45 feet. The stable will contain 24 stalls and they will have all modern improvements.

The following are bidding, bids due June 23: King, Killough & Co., W. J. McShane, Kendrick & Roberts, Inc., John McShane, Metzger & Wells and J. K. Ketchum.

A. E. Westover, architect, Keith Building, is working on plans for an office and theatre

building to be built on Main, Chippewa and Pearl street, Buffalo, N. Y., for B. F. Keith. The office building will be eight stories high. The theatre proper will be built of brick, stone, terra-cotta and marble trimmings. It will be handsomely finished on the interior, with every modern and up-to-date feature. The entire building will measure 94x136x231 feet. The office portion will be equipped with elevators and will be fireproof throughout. The structure is estimated to cost \$385,000. He will also send plans out in about one week's time for interior remodeling of the Trocadero Theatre, at Tenth and Arch streets, this city, for J. B. Wippeny, owner. Plans provide for new boxes, gallery and general remodeling.

Carl P. Berger, architect, South Penn Square Building, plans have been accepted in competition by the building committee for the new German Theatre to be built at Franklin street and Girard avenue. It will measure 93.4x114 feet, and will have a main entrance 20x98 feet, leading from Girard avenue. The exterior of the building will be of golden brown brick, with light terra-cotta trimmings, with tile roof and will be in the Renaissance style of architecture, modified by the German. The auditorium, foyer and grand hall will be decorated in light green and violet tints and purple and red. The balcony fronts, boxes, proscenium arch and structural lines in old ivory, and the woodwork in green antique weathered oak effects. The auditorium will seat 615 persons, with entrance on Franklin street and Girard avenue. The balcony will seat 412 and the gallery 414 persons. The stage will be 74 feet wide, 40 feet deep, and will open into a courtyard and driveway. It will be equipped with fire towers as well as the ordinary fire escapes. The entire building will be of fireproof construction and all the safety devices required by fire underwriters will be provided. The building is estimated to cost \$100,000. It will be at least two months before working drawings are ready. Mr. Berger has also been commissioned to prepare plans for a new church and Sunday-school building for St. Luke's M. P. congregation, to be erected at Broad and Erie avenue. It will be one-story and basement high, Gothic in design and will be built of stone and brick, and will be erected on a lot measuring 72x90 feet. It will have the usual church furnishings such as stained glass windows, pews, steam heat, wiring, etc. Working drawings will be ready in about one month's time.

BUILDING AND REAL ESTATE NOTES

Cramp & Co., builders, 1421 Filbert street, are the lowest bidders on the new storehouse and ammunition building, at the Frankford Arsenal, for the United States Army.

A. Whitehead, builder, 1624 Latimer street, has been awarded the contract to build the two-story stone stable on the Van Rensselaer estate, at Camp Hill, Pa., according to the plans of Wilson Eyre, Jr., architect, 929 Chestnut street.

Samuel Harting, builder, 16 East Johnson street, has been awarded the contract for alterations and additions to the residence of W. H. Poley, 33 East Upsal street, according to plans of Chas H. Hillman, architect, Provident Building.

Armstrong & Latta, contractors, Land Title Building, have been awarded the contract for the two-story and basement and office addition, measuring 60x50 feet, to the Kensington freight station, at Frankford avenue and Berks street.

Otto Domsen, electrical contractor, 2813 Germantown avenue, has been awarded the contracts for all electrical work in the new chapel building for church Sixty-third and Girard avenue, and station at Willow Grove for the Philadelphia & Reading Railway.

F. B. Davis, builder, 8 North Thirteenth street, has been awarded the contract to build the alterations and additions to the infirmary at the Zoological Garden, Fairmount Park, according to plans of Hewett Brothers, architects, Bulfinch Building.

John Davies & Son, builders, Frankford, Philadelphia, have been awarded the contract to erect the addition to the plant of Jacob L. Walton's Sons, Ruan street, Frankford, Philadelphia, recently destroyed by fire. Plans by Stearns & Castor, architects, Stephen Girard Building.

Lynch Bros., builders, Lippincott Building, have been awarded the contract to build the new lace factory at Stenton and Wyoming avenues, Wayne Junction, for the Simpson & Stern Company. It will be one-story high, 195 x40 feet, and will be constructed of brick and slow burning construction.

Ground has been broken for a two-story brick store building to be erected opposite to

the Buttonwood Hotel, at Darby, Pa. It will have the usual appointments. Plans and specifications by A. F. Damon, Jr., architect and engineer, Damon Building, Darby. He is now ready for sub-bids.

George Matchell, builder, 461 East Girard avenue, has been awarded the contract to erect six two-story and basement dwellings, on the west side of Layndale above Cottman street, for Lewis Webber. They will be built of brick, with all improvements. They will cost about \$9,500. Plans by Milligan & Webber, architects and engineers, 520 Walnut street.

Melody & Keating, builders, Bailey, Banks & Biddle Building, have been awarded the contract to build the south wing of St. Agnes' Hospital, at Broad and Mifflin streets. It will be four stories and basement high, 156x125 feet, and will be built of stone (details noted). Contract price, \$227,722. Plans by Edwin F. Durang, architect, 1200 Chestnut street.

Lynch Bros., builders, Lippincott Building, have plans posted for ten dwellings for C. A. Idler, to be built at Clearview avenue and Tulpehocken street, Germantown. They will be two stories high, of frame and stone and will have all modern and up-to-date improvements. Plans by Milligan & Webber, architects, 520 Walnut street.

Wm. H. Burns, builder, at West Chester, Pa., has been awarded the contract to build the new bank building for the Chester County Trust Company, at West Chester, Pa. It will be one-story high, of stone, and will have the usual bank furnishings (details previously noted). Plans and specifications by Wilson, Harris & Richards, architects and engineers, Drexel Building.

P. J. Hurley, builder, 1216 Chancellor street, has been awarded the contract for a three-story and basement factory building to be built at 1021-23 Callowhill street, for R. C. Humphrys & Son. It will measure 40x120 feet, and will be built of brick and slow burning construction. It will have tower fire escape, elevators and all factory improvements. Plans and specifications by Chas. E. Oelschlager, architect, Harrison Building.

John R. Wiggins & Co., builders, Heed Building, have been awarded the contract to build the office and factory building at 827-29 Filbert street, for Frank Hardart. It will be three stories and basement high. The walls will be Pompeian brick, with finishings in terra-cotta, and will measure 32x145 feet, and will cost about \$40,000. Plans by J. Franklin Stucker & Son, architects, 1421 Chestnut street. Work will proceed at once.

John Duncan, builder, 920 Walnut street, has been awarded the contract to build the one-story brick, iron and glass sun parlor, 30x54 feet, with circular roof, on the grounds of the Pennsylvania Hospital for Insane on the north side of Girard avenue west of Forty-fourth street, to cost \$10,000. Plans by Lord & Burham Company, architects, Irvington, N. Y.

Chas. Gilpin, Wm. Steele & Son and Kendrick & Roberts, Inc., builders, have plans posted for the nine warehouses to be built at the northwest corner of Light and Lombard streets, Baltimore, Md., for the Baltimore Safe

Deposit and Trust Company. They will be built of brick and slow burning construction and will be modern in their appointments. Bids due June 27.

McClintock & Weaver, builders, 60 West Johnson street, have been awarded the contract to build the Colonial designed residence for Wm. M. Bayer, Esq., on Wayne avenue, Germantown. It will be three stories high, 30x65 feet, and will be constructed of stone, with shingle roof. It will have porch on front and sides. The interior will be in hardwood finish and it will have very modern convenience and appointment. Plans by Lawrence V. Boyd, architect, Harrison Building.

Chas. Gilpin, Jno. Emory, Ryan & Kelly, Henderson & Co., H. B. Shoemaker & Co., builders, have filed bids for the new passenger station to be built at Oak Lane, Phila., for the Philadelphia & Reading Railway. It will be one-story high, 26x74 feet, and will be built of stone. There will also be erected on the other side a one-story stone waiting room, 16x50 feet. The interior finish of the proposed structure will be in chestnut and quartered oak.

DEAR SIR: I WILL CONTRACT
to heat your residence, however large or small, with HOT WATER, and file a Trust Company's bond for ten times the cost, the same to be forfeited if I fail in any direction.

This means that there shall be more than enough radiation at the smallest possible cost for coal. No leaks, no mistakes, no annoyances of any kind. The boiler to be of the best make.

The responsibility all mine, and the cost no greater because of good work and material.
Yours Truly,

D. A. McClelland, builder, 515-17 South Twentieth street, has been awarded the contract to make alterations and additions to 49-51-53 North Eighth street, for the Guarantee Trust Company.

Geo. F. Payne & Co., builders, 409 South Juniper street, are the lowest bidders on the dining hall and dormitory buildings for the Pennsylvania State College, at State College, Pa. Plans by Seymour & Paul Davis, architects, 907 Walnut street.

E. D. Yard, builder, 931 Commerce street, has been awarded the contract for alterations to 1208 South Broad street, for J. S. Miller. Plans provide for altering the first floor into store, with built window, new stone work, etc. Work will proceed at once.

W. R. Dougherty, builder, 1604 Sansom street, has been awarded the contract for alterations and additions to the sun parlor of the University of Pennsylvania Hospital, according to plans and specifications prepared by Brockie & Hastings, architects, 328 Chestnut street.

John R. Wiggins & Co., builders, Heed Building, have been awarded the contract to erect the five-story and basement warehouse at 216-18 North Third street, for Alfred Moore. Contract price \$40,000. Plans and specifications by John T. Windrim, architect, 1107 Walnut street.

Kendrick & Roberts, Inc., builders, 1211 Walnut street, have been awarded the contract to build the new warehouse for Seagrave & Harwood, on East Baltimore street, Baltimore, Md. It will be five stories high, of brick and slow burning type, and is estimated to cost about \$30,000. They have also been awarded the contracts to build two warehouses in Baltimore, Md. They will be six stories and basement high, brick, iron and concrete and will be semi-fireproof. They will cost about \$140,000 (further details later). They also have been awarded the contract to build the handsome new stable at Ithan and Montgomery avenues, Rosemont, Pa., for Mr. Joseph F. Sinnott. It will be two stories high, of stone with all sanitary fixtures and will be one of the handsomest in the community. They also have plans posted for a ten-story and basement office building to be built in the same city for Mr. Gunther. It will be constructed of brick and slow burning construction, and will have all modern improvements. Bids due in about ten days' time. They also request sub-bids on a storehouse and kiln building to be erected at the plant of Hale & Kilburn, at Eighteenth and Glenwood avenue. The storehouse will be three stories high, 55x140 feet, and will be built of brick and slow burning construction. Bids due in about one week's time. They also have plans posted for custom house and post office for the Treasury Department, of Washington, D. C., to be erected at Charlottesville, Va., according to plans of James Knox Taylor, Supervising Architect. Bids due in their office July 2. They also are ready for sub-bids for the alterations and addition to the Rehoboth M. E. church, at Frankford, Philadelphia. Bids due June 24, first mail, according to revised plans of Stearns & Castor, architects, Stephen Girard Building.

Bailey's Pure Rye Whiskey

Is Absolutely Free From Harmful Adulterations

The latest analysis of Bailey's Pure Rye Whiskey is by Dr. William C. Robinson, of the Philadelphia Bureau of Health. Under date of April 21st, 1904, he makes a report of tests carried out in the Bureau of Health's Chemical Laboratory. He tested the five brands by three separate well-known chemical methods and in summing up, says:

"I found these (Bailey's) Whiskeys to be free from adulteration with methyl alcohol and all foreign and injurious admixtures."

This confirms the analysis made by the chemists of Franklin Institute, and is in line with the endorsement of the Nurses' Club of Philadelphia and many well known physicians.

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior.

We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

Descriptive booklet and photographs mailed to your address for the asking.

Why is a Flake ?

graphite better for wear and protection to all exposed surfaces than any other form of graphite or paint pigment?

A Flake is Better—

Because **Flakes** overlap each other so closely that nothing can penetrate to the under or painted surface.

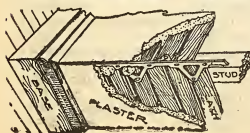

It is self-evident therefore that **Flake** graphite is better than any other form of graphite or paint pigment for protecting metals and all other exposed surfaces.

We own the Ticonderoga Graphite Mines, and they produce the finest, toughest, thinnest and best **flake graphite** for paint purposes in the world. *Dixon's Silica Graphite Paint* is made from Ticonderoga **Flake** Graphite. In four colors—one quality.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

At Baltimore, Md., an ordinance will be introduced in City Council to authorize the school board to ask for competitive plans from architects for the proposed Eastern High School, at the southeast corner of North avenue and Broadway, Baltimore. The estimated cost is about \$250,000.

C. E. Schermerhorn, architect, 430 Walnut street, has sent plans and specifications out for estimates for a new residence for Mr. Geo. W. McKinney, to be built on School Lane, Germantown. It will be three stories high, of brick and pebble-dashed, and will contain all modern and up-to-date improvements. Bids due June 30. The following builders are bidding: W. J. Gruhler, O'Brien Bros., Geo. Saunders, A. B. Simpson and Burd P. Evans.

Rowland W. Boyle, architect, 1626 Chestnut street, has sent revised plans and specifications out for bids for the new school building for St. Philomena Roman Catholic congregation to be built at Lansdowne, Pa. It will be two stories and basement high, 50x90 feet, and will be built of stone and will be heated by steam, wired for electricity and all modern and up-to-date improvements. Wm. McShane and John McShain, builders, are bidding. Bids due July 1.

Keisker & Nicholson, architects, Quinn Sharpless Building, have completed plans and invited estimates for a new house for Wm. T. Mingin, to be built at Moores, Pa. It will be three stories high, frame, stone foundation, 30x30 feet, and will have a porch on the front and side. The interior will be in hardwood finish and will have all up-to-date improvements. Bids due July 5. The following builders have been invited to bid: Geo. W. Sheaf & Son, H. Marion Zane, P. J. Hurley, Lynch Bros., R. C. Ballinger & Co., and Preston & Co.

Chas. E. Oelschlager, architect, Harrison Building, has completed plans and specifications and sent out same for estimates for a new residence to be built at Merchantville, N. J., for John Morgan. It will be three stories high, 35x60 feet, and will be built of frame and stone, with porches and will contain 15 rooms and bath, with all modern improvements. Bids due July 5. P. J. Hurley, E. J. Kreitzburg, Alex. Chambley, of this city; Geo. C. Tilton, M. J. James and Edward Fenton, local builders, are bidding.

Pugh & Hubbard, architects, Real Estate Building, have completed plans and specifications for a new factory for the Sagus Brick Company, to be built at Mobile, Ala. It will be three stories high, of mill construction and composition roof, and will measure 105x85 feet. It will be equipped with all the necessary machinery and boilers for the manufacture of brick. The owners will invite local builders

to bid. The above firm of architects have moved to their new office in the Real Estate Trust Company Building, Broad and Chestnut streets, Room 1334.

M. H. Dickerson, 2d, architect and engineer, Land Title Building, has completed plans and taken out a permit for a new residence to be built on the north side of Spruce street east of Forty-sixth street, for J. Franklin Moss, owner and builder, 2502 North Thirty-third street. It will be in the Spanish renaissance style of architecture, and will be built of Pompeian brick, Roman size, and will measure 31x 63 ft. It will have hardwood on the interior and all modern conveniences and appointments and will cost about \$10,000. The owner is now ready for sub-bids.

Architect H. G. Blackwood, 126 North Washington avenue, Scranton, Pa., has prepared plans for a four-story brick printing plant and office building for the Scranton Times. Steam heat, plate glass, modern conveniences. Also plans by same architect for a three-story, brick flat to be erected for Mr. I. Goodman. Steam heat, tile work, plate and leaded glass. Also plans for a two-and-a-half-story dwelling for Mrs. John Lockery. All modern conveniences. Also plans for a store building for Goldsmith's Bazaar. Four stories high, slow burning construction, plate and leaded glass, gas and electric fixtures, modern conveniences.

The Tradesmen's Trust Company, now located at 1517 Chestnut street, has purchased the property at the southeast corner of Juniper and Chestnut streets, now occupied by Fluke's Grocery Store. It is the intention of the company at the expiration of their lease, which will be the latter part of 1905, to erect a modern bank and office building. The board of directors are Edward T. Davis, William R. Chapman, William McCoach, J. Gray Bolton, Percival E. Loder, S. H. Ashbridge, Thomas S. Boyle, Thomas E. Baxter, Peter Boyd, William J. McMullin, A. L. English, Edwin F. Merritt, Thomas Bradley, Lawrence McCormick, Chas. B. Prettyman.

At Scranton, Pa., plans have been prepared by Architect Louis Hancock, Library Building, for a two-story dwelling to be erected at Mayfield for Mr. M. Hart. Also plans by same architect for a two-and-a-half-story frame dwelling to be erected at Jermyn for Mr. M. J. Eagan. Architect G. N. Edson, Connell Building, has prepared plans for a store and apartment house to be erected for H. A. Coursen, architect. J. H. Davey, Coal Exchange Building, has made plans for a school building to be erected at Old Forge. Steam heat, plate glass, modern conveniences. Architect H. C. Rutherford has prepared plans for a dwelling to be erected at Waverly, Pa., for Dr. C. H. Mackey. Architect J. A. Duckworth has prepared plans

and is receiving bids for a school building to be erected at Taylor, Pa. Brick, plate glass, steam heat, tin and slate roofing.

W. L. Plack, architect, 1208 Chestnut street, has sent plans out for estimates for the \$100,000 Blair County Retreat for the Insane, to be built at Hollidaysburg, Pa. The building will be two-and-a-half stories high, 40x160 feet, and will be built of re-enforced concrete, and will be fireproof throughout. It will be equipped with every modern appointment and will be one of the most complete institutions in the country. The bids are due July 5. The following are bidding: Roydhouse, Arey & Co., and Warner & Stinson, of this city; Wm. Prevost, Jr., of Chester, Pa.; J. Waring, of Tyrone, Pa.; W. H. Hughes & Son, Vipond Construction Company, Laughlin & Mackey, P. W. Finn and Altoona Concrete Company, of Altoona, Pa.

Ballinger & Perrot, architects and engineers, 1200 Chestnut street, have completed plans and are now ready for sub-bids for a three-story packing and shipping warehouse to be erected at Front and Linden streets, Camden, N. J., for the Victor Talking Machine Company. It will measure 62x147 feet, and will be built of fireproof construction. All bids due July 1. They have also invited sub-bids until July 5 for the proposed new \$125,000 plant to be erected at Twenty-third and Manning streets, for the Crane Ice Cream Company. The plant will be of re-enforced concrete, fireproof throughout. It will be two stories high, with fronts along Twenty-third and Twenty-fourth streets. It will be 110x240 feet. The Twenty-third street front will be used for store and office purposes, and the Twenty-fourth street end will be used for stable and factory purposes, each being separated. The exterior walls will be built of Pompeian and red brick.

Hale & Morse, architects, Drexel Building and New York, have completed plans and specifications and invited estimates for the handsome new \$125,000 high school to be built at Plainfield, N. J. will remain elastic, thus responding to the expansion and contraction of the metal in hot and cold weather and,

BEST OF ALL,

it will not corrode the tin, as is the case with so many roof paints made from cheap metallic ore.

It is a positive preserver of tin, not a destroyer of it

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results

far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

John D. Allen & Co., architects, Betz Building, have completed plans and specifications for extensive alterations and additions to the residence of Henry Fernberger, at 1306 North Broad street.

E. M. Sansom, architect, 110 South Fourth street, has completed plans for alterations and additions to the saloon and residence of Fred Stierlen, at the northeast corner of Belmont avenue and Stiles street.

Watson & Huckel, architects, 1211 Walnut street, have invited estimates for a one-story addition of brick to the Kensington Hospital for Women, at 136 Diamond street. Bids due July 7. F. S. Riggs, J. Johnson and Burd P. Evans are bidding.

J. Horace Cook, architect, of the Board of Education, City Hall, will have plans ready for bids the latter part of this week for a \$50,000 addition to the Nichols' School, at the northeast corner of Sixteenth and Wharton streets. The addition will be erected to the north of the building.

Architects Welch, Smith & Provot, 11 East Forty-second street, New York, have been commissioned by the committee of the Young Women's Christian Association, of Paterson, N. J., for a new building to be erected at Church and Ellsworth streets, Paterson, N. J., to cost \$50,000. Plans made and accepted.

Robertson Lea Perot and Elliston Perot Bissell, associate architects, Bailey, Banks & Bidle Building, have completed plans and specifications and are now ready for estimates for the heating plant for the addition to the Germantown Academy, as planned by them, now in the course of erection.

Mantle Fielding, architect, 110 South Fourth street, has been commissioned to prepare plans for a handsome new edifice for the congregation of the Forbes Memorial Episcopal church, at New Haven, Conn. It will be in the Gothic style of architecture and will be constructed of cut stone and will have the usual church furnishings.

Carl P. Berger, architect, South Penn Square Building, has completed plans for extensive improvements to kitchen building, new help and nurses' dormitory of the German Hospital, Corinthian and Girard Avenue. The following builders have been invited to bid: A. Raymond Raff, Stacy Reeves & Son, Geo. F. Payne & Co., Lewis Haven's Sons. Bids due July 19.

At Asbury Park, N. J., it is stated that a large hotel to be open all the year will be erected by a stock company at a cost of \$200,000, exclusive of the site. Plans for such a structure were submitted at a recent meeting of stockholders by Architect Clarence W. Smith, who also designed the Grand Avenue Hotel, Asbury Park. Among those interested are

Henry Steinback, T. Frank Appleby, of Asbury Park; Hiram Walton, Thomas Noble, Benjamin F. Smith, A. R. Parsons and J. Warren Coleman.

Watson & Huckel, architects, 1211 Walnut street, have sent plans and specifications out for bids for a store building for Mr. Alex. Simpson, to be built at the southwest corner of Ninth and Cherry streets. It will be four stories high, 18x58 feet, and will be built of Pompeian brick and will have all modern and up-to-date improvements. Bids due July 7. The following have been invited to bid: Lynch Bros., P. J. Hurley, Reynolds & Caldwell, H. Saunders and Lam Building Company.

It will be recalled that about a year ago we reported that 527 Chestnut street, adjoining the office building of the Real Estate Title Co., had been purchased by that company with the view of extending its office facilities. The company is now considering these improvements, and in that direction Architect John T. Windrim, 1107 Walnut street, is preparing plans. The extension will be fireproof and its front will conform to that of the company's present building. This is all that can be said about it at present.

BUILDING AND REAL ESTATE NOTES

J. S. Cornell & Son, builders, Land Title Building, have been awarded the contract for alterations and additions to the residence of Mr. Spencer, at Lansdowne, Pa. Work will proceed at once.

Martin James, builder, Merchantville, N. J., has been awarded the contract to build the handsome new residence of Coates Walton, at that place. It will be three stories high, of brick, stone and frame, and will have every modern appointment and convenience (details previously noted). Plans and specifications by Chas. J. Brooke, architect, 14 South Broad street.

Thomas Seeds, Jr., builder, 1216 Race street, has been awarded the contract to build the new clubhouse for the United Republican Club, at 3158 Frankford avenue. It will be three stories high, 20x96 feet, and will be built of brick with every modern improvement and convenience. Plans and specifications were prepared by Caldwell & Simon, architects, 1229 Walnut street. Work will proceed at once.

John T. Worrell, builder, at Rosemont, Pa., has been awarded the contract to build the handsome new residence at Wynnewood, Pa., for Mrs. H. L. Innes. It will be two and a half stories high, of brick, frame and stone. It will have a porch on front. The interior will be finished in hardwood and it will have all modern improvements. Plans and specifications by Bailey & Bassett, architects, 421 Chestnut street.

Sol. Greenberg, operative builder, 907 Walnut street, will erect an operation of 58 two-story houses at Sixty-sixth and Lansdowne avenue. They will measure 15x47 and 15x46 feet, and will be built on Sixty-sixth and Sixty-seventh streets and Lansdowne avenue. They will be constructed of brick, with porch fronts and will have every modern appointment and convenience, and will cost about \$116,000.

Henry C. Dahl, builder, 408 South Fifth street, has been awarded the contract to erect the one-story frame chapel, to be built at Fifty-fourth and Catharine streets, for the Wharton Street M. E. congregation. It will be one-story high, 20x100 feet. He has also been awarded the contract to build a four-story warehouse, measuring 20x84 feet, at 523 South Second street, for John W. Margatroyd. It will have all up-to-date improvements and will cost \$6,500.

F. L. Hoover & Son, Inc., builders, 629 Chestnut street, have been awarded the contract to build the new residence at Edge Hill, Pa., for Mr. W. C. Gilbert. It will be three stories high, 20x46 feet, and will be built of Chestnut Hill stone. It will be finished on the interior in hardwood and will have a porch on the sides and will contain twelve rooms and bath with all modern improvements. Plans and specifications by Hencock & Hokanson, architects, 931 Chestnut street.

Geo. F. Payne & Co., builders, 409 South Juniper street, have been awarded the contract to build the dining hall and dormitory building, which will be three stories and basement high, of stone (details previously noted), at State College, Pa., for the Pennsylvania State College, at that place, at a cost of \$100,000. Plans and specifications by Seymour & Paul Davis, architects, 907 Walnut street, Philadelphia. They also have been awarded the contract to build a stone wall with a granite clock tower around the present Capitol Park, at Harrisburg, Pa. It is estimated to cost \$200,000.

W. R. Dougherty, builder, 1604 Sansom street, has plans posted for the handsome new residence of Chas. W. Welsh, to be built at Oak Lane, Philadelphia. It will be three stories high, in the Elizabethan style of architecture, and will measure 59x35 feet, and will be built of brick, stone and rough-cast. The interior will be in hardwood finish and will have all conveniences. Bids due July 9. Plans and specifications by John T. Windrim, architect, 1107 Walnut street. He also has plans posted for the new Orthopaedic Machine and Shoe Shop of the University of Pennsylvania, Thirty-fourth and Spruce streets. Bids due July 9. Plans by Brockie & Hastings, architects, 328 Chestnut street.

DEAR SIR: I WILL CONTRACT to heat your residence, however large or small, with HOT WATER, and file a Trust Company's bond for ten times the cost, the same to be forfeited if I fail in any direction.

This means that there shall be more than enough radiation at the smallest possible cost for coal. No leaks, no mistakes, no annoyances of any kind. The boiler to be of the best make.

The responsibility all mine, and the cost no greater because of good work and material.

FOR Plastering Walls and Ceilings J. B. KING & CO., No. 1 Broadway, New York

The 20th Century Hot Air Radiator System of Heating

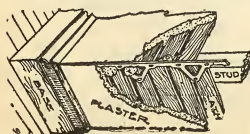

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the re-

sults far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

DYCKERHOFF PORTLAND CEMENT

E. THIELE, Sole Agent, 99 John Street, New York.

Made in Germany and used in the United States for more than twenty-five years. The high esteem in which it is held is due to its correct chemical composition, great strength and constant uniformity—perfections which have not been approached by any other cement.

THE OLDEST AND LEADING TITLE INSURANCE COMPANY

CAPITAL FULL PAID - - - - - \$1,000,000

This Company, incorporated in 1876, originated Title Insurance, and, having issued over 82,000 Policies, has accumulated information which enables it to execute work with unequalled accuracy and promptness.

Executes trusts of every description.

Becomes surety for persons acting in fiduciary capacities.

Issues its well-known 4 per cent. mortgage trust certificates, secured by first liens on property in Philadelphia only, taken largely by trustees executors and our most careful investors.

Loans money on instalment mortgages.

Receives money on deposit subject to interest.

Rents safes in its burglar-proof vaults.

Buys and sells real estate, and assumes the general management thereof.

A Shrewd Operative Builder

FULLY COMPREHENDS the importance of attractive and impressive selling factors in commanding the attention and preference of buyers. For this reason, OPERATIVE BUILDERS have already realized that one of the best selling cards is to be able to say to a prospective customer that the house is glazed with POLISHED PLATE GLASS. Its cost, while somewhat more than that of common Window Glass, is fully justified by the additional attraction and value which Plate Glass gives to the property, and its influence upon a buyer can hardly be overestimated.

PHILADELPHIA, WED'Y. JULY 13, 1904

In the way of demonstration, showing the efficiency of Frank W. Dilks' Twentieth Century Hot Air Radiator System of heating dwellings, we have personally seen a radiator resting on the floor at about the same level as the fire in the heater, heated so hot that one's hand would be burnt if allowed to remain on it for any length of time. This result was accomplished with a very moderate fire and without forced draft of any kind, and that, too, through over twenty feet of uncovered black pipe, of which two-thirds at least was vertical.

Those interested in the heating of houses may prepare themselves to hear of some wonderful results in both the efficiency of this new system and its economy in the consumption of coal.

ARCHITECTS' NOTES

Brockie & Hastings, architects, 328 Chestnut street, will send revised plans out for estimates the latter part of this week for the isolating ward building of the University of Pennsylvania (details previously noted).

At Pittsburgh, Pa., it is stated that Architect F. G. Osterling, Times Building, Pittsburgh, is preparing the plans for the proposed building to be erected by the Scottish Rite Masons in the Oakland District, at a cost of \$250,000. Mr. George W. Guthrie is chairman of the site committee.

At Fort Lee, Bergen county, N. J., Architect John Signell has prepared plans for a borough hall to be erected at Edgewater, Bergen county, N. J. It will be two stories high, 50x70 feet, modern conveniences. The cost will be about \$25,000. Bids for its construction will be received until July 19.

Hale & Morse, architects, with offices in the Drexel Building and Baltimore, Md., have been commissioned to prepare plans for a new tailoring establishment to be built at Baltimore, Md., for the Safe Deposit Company, of that city. The building will be four stories and basement high, and will have an entire front of glass so as to give plenty of light. It will have all modern improvements. Further details later.

The commission appointed by the last Legislature to select a site for the State Hospital for Feeble Minded and Epileptics has chosen a tract of ground near Spring City, Chester county, Pa. There are three hundred acres in the site and the price paid was \$32,000. An architect will be selected at once to design buildings. Senator John K. Scott is chairman of the commission.

Watson & Huckel, architects, 1211 Walnut street, are working on plans and specifications for a new church to be built at Jenkintown, Pa., for the Roman Catholic congregation of the Immaculate Conception. It will be stone and will have the usual church furnishings. It is expected to invite bids in a few days. They are also preparing plans for remodeling the church of St. Michael and All Angels, on St. Paul street west of North avenue, Baltimore, Md. The work will be principally in the sanctuary and chancel.

At Washington, D. C., Architect B. Frank Meyers has prepared plans for a number of dwellings to be erected on Columbia road and Ontario Terrace. They will be three stories high, of brick and brown stone, each to contain nine rooms and a bath. Also by same architect plans for six three-story brick and stone dwellings, Colonial in style, to be erected at the northeast corner of Thirteenth street and Kenesaw street. They will contain ten, eleven and twelve rooms each, and finely equipped bathrooms. Also plans for four two-story dwellings to be erected on Morton street between L. M., Sixth and Seventh streets. Also plans for 12 two-story dwellings at School and Grant streets, Mt. Pleasant.

Bids will be filed this week with Jacob Naschold, architect, 504 Walnut street, for the handsome new residence to be built at Bryn Athyn, Pa., for Dr. George M. Cooper. It will be three stories high, 42x35 feet, and will be built of stone, with all modern improvements. The following builders were bidding: A. Raymond Raff, Thomas M. Seeds, Jr., Jos. V. McCloskey and Thomas Little & Son.

Rowland W. Boyle, architect, 1626 Chestnut street, has sent plans and specifications out for estimates for a two-story brick stable to be built at Fifty-third street and Chester avenue, for the Little Sisters of the Poor. Bids due July 14. John McShain, William McShane, Frank T. Maguire and James Doyle are bidding.

Geo. E. Savage, architect, 401 Chestnut street, will send plans and specifications out the latter part of this week for the new edifice for St. Andrew Lutheran congregation, to be built at Sixth and Ritner streets. It will be Gothic in design and will be two stories high, 75x85 feet, and will be built of stone. It will have the usual church furnishings. He will also send out plans and specifications soon for a new residence for Mr. N. Crissy, to be erected at Fox Chase. It will be two and a half stories high, and will be built of Pompeian brick, with stone foundation. It will have a porch on two sides and will contain 14 rooms, with all modern improvements, such as hot water heating, wiring for electricity, best plumbing, etc.

BUILDING OPERATIONS

AND

TRANSFERS OF REAL ESTATE

4507 new buildings of all kinds for which permits were issued, costing \$14,504,123, exclusive of the cost of the land; 1533 more new buildings than for the same months last year, but the investment is less by \$4,630,391.

1142 alterations and additions (costing \$300 and over only included), costing \$1,713,000, an increase of 92, with an investment increase over last year for the same months, of \$138,000.

A shrinkage in industrials of \$6,856,507.

The total expenditures this year on new and old buildings amount to \$16,217,123, while last year the total for six months was \$20,709,514, the difference being \$4,492,391.

The above synopsis of this year's building construction thus far is for all practical purposes the meat of the whole question; but this year's work will not suffer in comparison when it is stated that a single building for which the permit was issued in March, 1903, was responsible for the excess of the first half of that year over the first half of this. John Wanamaker's new store building, at Thirteenth and Market streets, represented \$5,000,000 of last year's totals.

It was quite evident at the beginning that 1904 was not to be characterized by an enormous quantity of big work, and when the shrinkage in what is known as "heavy work," such as big office buildings, mills, factories and bottling-houses of \$84,000, will be recognized that considerable was done in other directions to make up the present creditable showing.

These shrinkages in important buildings are enormous. Office buildings over two stories have an unimportant gain of two in number and \$32,000 in the investment, while there is also a gain in the investment in breweries and bottling-houses of \$84,000. These are the only gains which can be claimed for buildings to be used for business purposes, for even our favorite miscellaneous buildings fall short 18 in number and \$107,281 in investment from those we accounted for in our July report of 1903.

There are 4 more warehouses this year, but their

cost is less by \$139,150 than the cost of the 18 up to July 1 last year.

Dye and dryhouses are 4 less than last year, while the investment losses \$119,950.

Factories are 14 less, and the investment is less by \$450,570.

Engine and boiler-houses are 9 more than last year, but with this increase in number the investment is less by \$394,257.

There are 6 less foundries, and the investment is less by \$126,550.

Stores (not "stores and dwellings") are 3 less, but the enormous increase in the investment is \$7,760,950 is much heavier than in any other direction.

Schools lose 4 and \$785,283 less in the other direction expended in these buildings during the same months of 1903.

There are 6 more churches, but the investment is less by \$92,600.

These losses in the investment end of the different class of buildings as above enumerated amount to \$7,788,590, from which we must deduct the gain in breweries and bottling-houses of \$45,200, and also that in office buildings over two stories of \$32,000, and we have a net shrinkage of \$7,702,390.

Hence it will be seen that it was up to the operative builder and the four-story dwelling admirers to make good this enormous loss to an extent, at least, to enable Wanamaker's \$5,000,000 store of last year more than equal the deficit of the year 1903.

There are those who will regard this year's enormous shrinkage in industrial buildings, which really amounts to \$6,165,000, as an epidemic of the year, the deterioration of the influences around which national as well as our own local industries centre; and indeed it may be argued, and very justly argued, that this is the very sentiment which we ourselves have always expressed.

While this is true as the best possible evidence that greater material is being required to meet a growing demand, a shrinkage in the construction of buildings of this character in any year would not indicate a deterioration of either local or national industry.

The new mills, factories and warehouses, as well as other industrial buildings, are represented to the extent of 124 this year, and the investment in these amounts to \$1,790,143; and this conclusively shows, if it shows anything, that, notwithstanding the enormous shrinkage in the other classes of buildings, the desired greater manufacturing facilities and others who embarked into manufacturing ventures even though this is the Presidential year, and the business in the crests of the country are changing from abnormal to normal conditions.

There is necessarily a limit, for these increased facilities can be easily made to outgrow the ratio of growth of population; and when this becomes the case, restriction is wholesome as well as unavoidable.

It does not follow, then, because we are as well as courageous class, known as American manufacturers, conclude that their facilities have already reached the maximum and accordingly stop building and enlarging, that our national or local industry and enterprise is to suffer the least impairment, for it is, sentimentally and otherwise, the utilization of these forces through which millions find employment.

Abnormal conditions mean, as we understand the term, that men have gone crazy in their direction; that their wants and desires have outgrown both their judgment and ability to pay. The fellow already loaded with stocks wants more stocks, and anything and everything find buyers at exalted prices.

The farmanth partakes of the infection and hurries to the big cities to share in the great prosperity.

The foreign mechanic and workman, not in the least deterred by distance, embark for the El Dorado and help swell the multitude, to face discharge and idleness just as soon as the abnormal and unhealthy demand has been met.

The business man who reaped his \$50,000 net yearly profit under this abnormal condition shrinks with alarm at the fading away of his business opportunity, and while his present \$30,000 net yearly profit may be two or three times greater than he ever realized before being struck with this "luck," he gives the most exaggerated importance to the shrinkage or takes comfort in the idea that the abnormal will again prevail after the fact.

The country, the people, the soil, as well as the brains and the energy, are still here. The extra demand for industrial products in every direction has been supplied, business is gradually reaching its supply and demand basis, and this basis must suffer through comparison when conditions are considered and discussed.

The following letter from Mr. W. Bruce Barrow, who makes a specialty of selling and leasing factories, mills, etc., we have been studying.

Real Estate Record and Guide,

46 N. Eleventh St.

Mr. J. N. Gallagher.

Dear Sir:—In reference to the manufacturers' as well as the real estate owners' interests, the factory question just at this writing is quiet.

During 1903 manufacturers were very busy and prosperous; every factory of any note was occupied and running full time.

The depression in stocks I remember rightly—in December of that year and in January of 1904 caused a depression generally.

There have been, however, comparatively few failures considering this depression, but this I attribute to the prosperity of 1903 carrying the manufacturers over.

While the manufacturers claim that time have been holding their own—as it were—they have been running on short time, and there has not been the demand for the building of new factories or the lessening of the unoccupied spaces that was witnessed in 1903. It is seen to me that vacancies in the new modern mills are very few.

There has been but little demand to purchase. I am waiting for active buyers and there are the results of new enterprises. I do not feel that there should be any uneasiness on the part of owners or manufacturers from the present state of affairs. The industry is exceedingly busy year in 1905, and trust that we shall not be disappointed.

The greatest depression I have noticed has been among the iron industries, but a few conservative firms are preparing for an active market.

It is plain that the small dwelling end of the real estate proposition must suffer, and that the vacant house list must increase in proportion.

There is, however, no signs of this at present, for in our investigation we found that one rental list of 450 small dwellings had at the time of writing less than 3 per cent. vacant, while another list of 500 houses of all kinds, even including the high-priced houses, had but 7 vacancies, while still another of 330 small dwellings had but two vacant, and another large list had but 1 per cent. vacant.

There is a fair criterion, for they take in all sections of the city.

A very singular fact prevails in face of the whole. The great changes in the industrial, and that exists among the saving fund institutions of this city, which show considerable increase in the volume of money invested, and a corresponding increase in the while the number of new depositors does not show a material increase. It is very evident that the sober, thrifty and saving industrial class has not been materially affected.

The year has been phenomenal in many respects. Messrs. Hazlett & Moss, 631 Walnut street, who make a specialty of making buildings to builders, tell us that the volume of their business this year up to June 30 last reached within 10 per cent. of their year's business for 1902. They are, however, entirely satisfied as to the present outlook, and not in the least pessimistic. He thinks, however, that the erection of small houses will eventually be overdone as heretofore, and that caution is necessary.

Money for building purposes is rapidly becoming scarce, and this may halt many proposed operations. The land formerly held by builders for operations seems to have been generally utilized. This, will, we think, create an extensive demand for land, but in 1902, when there were built 494.

We turn with considerable interest to the work of our operative builders, who are certainly entitled to the credit of keeping up this year's building record. We record 3,758 two-story dwellings and 441 three-story dwellings (these include "stores and dwellings"), a total of 4,199.

It will be noticed that this is the greatest number of two-story dwellings that has been erected in the first six months of any year since 1899, when the record was 4,566. The largest number in these same months since this journal was established was in 1899, as can be seen by our July report of that year, and the number was 4,714.

The three-story dwelling of this year was beaten in 1902, when there were built 494.

The sale of small dwellings this year has been phenomenal, and indeed it is a question if the selling price of two-story dwellings ever before reached such a high average. There were enough of these West Philadelphia two-story dwellings sold at \$4,500 and even \$5,000 each to merit comment.

Rents have lately everywhere risen ten per cent. as an average, and the tenants have stood it without wincing.

West Philadelphia is responsible for 77 new two-story dwellings in the Twenty-fourth ward; 776 in the Twenty-seventh; 1907 in the Thirty-fourth, and 373 in the Fortieth. Right here, then, in a single section of the city, 2,933 new two-story dwellings have been erected out of a total of 3,758 or over 61.8 per cent. of the entire number.

We are somewhat disappointed in the total consideration given in our table of transfers, for, while there were 821 more recorded in 1904 than during the first six months of 1903 the consideration is increased only \$726,016.58. It was our opinion before reaching the figures as shown by our tables that \$600,000, at least could be shown, because, as a fact, never before in the history of the paper have the title companies done such a title business, and never before have so many extra pages been required to admit of their publication in this journal.

We are indebted to Mr. Theodore James, assistant chief clerk of the Board of Revision of Taxes, for a copy of the "Manual for the Taxpayer for 1904." In this it is stated that on January 1, 1904, there were 275,269 dwellings in this city including "stores and dwellings."

Our readers with good memories will recall the fact that in our issue of August 29, 1900, we stated that the official number of dwellings of all kinds in this city on January 1 of that year was 258,858, and then in four years this character of building had increased in number by 16,584, or a yearly average increase of 4,146.

Our good friends in criticizing this statement must not forget that the yearly figures of construction work cannot be made to tell these facts, because there are lots of old houses that are torn down to make room for the new.

It will be seen that the properties transferred this year bear a mortgage encumbrance of \$23,415,787.68 or 46 per cent. We desire it noticed that the percentage of mortgage encumbrance has enormously increased. Last year for the same months it was 34.4 per cent.; while in 1902 it was 39.1 per cent.; in 1901, 39 per cent. in 1900, 39.7 per cent.; 1899, 38 per cent.; 1898, 36.5 per cent.; 1897, 39 per cent.; 1896, 34.5 per cent.; 1895, 30 per cent. So it will be observed that abnormal conditions struck the dwelling buyers about as vigorously as it did the buyers of United States Steel.

This enormous increase in the per centage of encumbrance would indicate that there are breakers ahead for somebody if restrictions among the industrials continue.

The ground rents amount to \$220,854.83, which on a six per cent. basis represent an additional encumbrance of \$3,680,913.83.

This then is an additional encumbrance on the properties transferred of 7.2 per cent., which, when added to the mortgage encumbrance of 46 per cent., makes a total encumbrance of 53.2 per cent., or more than one-half of the year since this journal was first published.

The sales of real estate at auction this year amount to \$2,166,341.33. This is an increase over our last year's record of \$422,337.89. The mortgage encumbrance on the properties sold at auction this year amounts to only \$1,600.00, and the ground rents amount to but \$1,554.87.

The following table of transfers since 1899 inclusive will enable the reader to follow the fluctuations for the first half of each year:

Transfers.	Value.
1889—8,419	\$4,374,824.05
1890—8,160	42,003,784.01

ARCHITECTS' NOTES

Charles E. Oelschlager, architect, Harrison Building, has completed plans for the three-story frame residence to be erected at Haddon Heights, N. J., for M. A. Ermolds. Bids due July 16. The following are bidding: F. B. Davis, Martin J. James, E. J. Kreitzburg, Alex. Chambley and C. W. Moore.

W. G. Eckles, architect, New Castle, Pa., has prepared plans for a gymnasium at State Normal School, at Edinboro, Pa. Plans ready about July 25. Also plans for Union City High School, at Union City, Pa. Plans ready about July 20. Also plans for Almira Home for Aged Ladies, at New Castle, Pa. Bids close July 15.

Heacock & Hokanson, architects, 931 Chestnut street, have completed plans and specifications for a new residence to be built at Wyncote, Pa., for William H. Berger. It will be two and a half stories high, 22x39 feet, and will be built of stone, with porch front and side. The interior will be in hardwood finish, and it will have every modern and up-to-date appointment. Work on this house will be done by day's work.

C. E. BUILDING AND REAL ESTATE NOTES

Thomas M. Seeds, Jr., builder, 1216 Race street, has plans posted for five two-story stone dwellings, measuring 17x45 feet each, to be built in Germantown, Philadelphia, for David McMahon.

Chas. Gilpin, builder, Pennsylvania Building, has plans posted for a car repair shop for the Philadelphia & Reading Railway Company, to be built at Newbury Junction, Pa. It will be one story high, of brick, 302x118 feet, and will be built of brick with lantern roof.

Heaton & Wood, 1706 Chestnut street, the well known parquetry floor house, have recently built a completely equipped warehouse for the storage of hardwood flooring. The situation is very central, 3312 Lancaster avenue, where they have on hand, for the accommodation of their customers and the trade generally, a full line of quartered oak strip floors, all thicknesses, together with block floors and the parquetry. Their building is furnished with the latest steam heating system, and flooring is kept in the same perfect condition as when coming from the kilns in Indiana and New York, where they are connected with the Wood Mosaic Flooring Company in cutting, milling and drying large quantities of lumber. Their lumber is cut in the winter when the sap is out and afterwards dried by a slow and improved process, insuring the finest product obtainable. One contract of theirs alone, the Bellevue-Stratford Hotel, will require many thousand feet of parquetry flooring. Their trained staff of floor finishers and polishers makes it easy for them to give prompt attention when there are old and worn floors to be renovated.

Alexander Chambley, builder, 243 South Tenth street, has been awarded the contract to make alterations and additions to 707 North Broad street, for the Journeymen Bricklayers' Protective Association, of Philadelphia, according to plans of Wilson, Harris & Richards, architects, Drexel Building. Work will proceed at once.

Doyle & Doak, builders, 1509 Sansom street, have been awarded the contract to make alterations and additions to 1617 Chestnut street, for John P. Doherty. Plans provide for a new front four stories high, of stone, an additional story to the rear of brick and general interior remodeling. Plans and specifications by Spencer Roberts, architect, 1524 Chestnut street. Work will proceed at once.

John R. Wiggins & Co., builders, Heed Building, have plans posted for three buildings to be built in Baltimore, Md. One is an office building, four stories high, for J. Latimer Hoffmann, to be built on Lexington street. The other two are five-story warehouses to be built on Hanover street, for the Gaither estate. They will be built of brick and slow burning construction. Bids due July 18.

F. L. Hoover & Sons, Inc., Hill & Stevens, M. Hauser, H. Godfrey, James A. Bradin and D. W. Sperry, builders, have submitted bids with Heacock & Hokanson, architects, 931 Chestnut street, for the first Baptist church, to be built at Glenside, Pa. It will be two stories high, 42x38 feet, and will be built of stone and pebble-dashed, and will have the usual church furnishings.

Geo. F. Payne & Co., builders, 409 South Juniper street, have been awarded the contract to build the Garretson Hospital, at 1807 Hamilton street. It will be four stories and basement high, and will be fireproof and will measure 70x37 feet, and will have a brick tower fire escape at the rear. It will be fitted up with the usual up-to-date hospital appointments. Plans by Horace Trumbauer, architect, Land Title Building.

W. R. Dougherty, builder, 1604 Sansom street, is bidding on the interior finishing of the Church of the Epiphany, at Tenth and Jackson streets, according to plans and specifications of Watson & Huckel, architects, 1211 Walnut street. Bids due July 16. Also he has filed bids for alterations to house at Twenty-first and Locust streets, for H. E. Drayton, Esq. Plans by Furness, Evans & Co., architects, 404 Chestnut street.

Wm. Steele & Son, builders, 1600 Arch street, have plans posted for a five-story and basement textile manufactory, measuring 150x56 feet, with a wing 45x40 feet, and a boiler and engine house 82x32 feet, all to be built of brick and slow burning material, for Thomas E. Brown, and to be erected at Second and Westmoreland streets. They also want sub-

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior.

We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Sewed for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

which contain about twenty acres. Hardwood interior finish in dwelling and the roof will be of slate.

At New York, Mr. William E. Diller, contractor, 571 Fifth avenue, will erect two five-story dwellings on Seventy-second street. They will be of Indiana lime-stone and brick and they will be provided with elevators and all modern conveniences. Mr. Diller will award all the contracts. No architect has been selected.—Ludlow & Valentine, 1 East Twenty-seventh street, have completed plans and will receive estimates within the next four weeks for building the Lenox Presbyterian Church on a plot, 114x127, on the northwest corner of St. Nicholas avenue and 141st street. The building will be of light colored Roman brick and Indiana limestone trim with slate roof and stone spires. The clerestories will be covered with ornamental copper. The interior trim will be of oak. The style is Gothic with the open timbered truss. There will be four toilet rooms, electric lights and the steam and blower system of heating and ventilating. Seating capacity will be 900.—Hoppin, Koen & Huntington, 244 Fifth avenue, have prepared plans for \$10,000 worth of improvements to the four-story dwelling 28 East Thirty-sixth street, for Gerald Hoyt, of Staatsburgh, N. Y. The work consists of installing iron, frame bay windows, a new conservatory, vault under sidewalk, vent shaft and partitions. No contract has been let. Sealed bids or estimates will be received by the Board of Health of the Department of Health until 2 o'clock a. m., on Wednesday, July 20, 1904, for furnishing all the labor and furnishing and erecting all the materials necessary or required to complete certain additional masonry work, plumbing work, steam heating work, etc., at the boiler house, disinfecting and laboratory building, at the Kingston Avenue Hospital, Kingston avenue and Fenimore street, Borough of Brooklyn.—By the President of the Borough of Richmond, July 19, for the structural iron and steel work required in the erection and completion of a jail at Richmond, Borough of Richmond, as shown on amended plans on file in the office of the President. Also, for installing electric equipment in the Richmond Borough Hall, situated at Jay street and South street and Stuyvesant place, St. George.

—Plans for a large new plant are in course of preparation by James Pyle & Sons, Greenwich and Vestry streets, New York. It is to be located at Edgewater, N. J., near the new plant of the American Glucose Company, and is to be devoted to the manufacture of pearline. A large tract of land has been purchased, and the intention is to build an immense establishment.—B. T. Babbitt, the soap manufacturer of 61-84 Washington street, New York, contemplates the construction of immense new works at North Bergen, near Hackensack, N. J. A very large tract of land has been purchased at this point and plans are rapidly being completed for a great new factory system. It is intended at present to erect some thirteen large buildings, all of which will be devoted to the manufacture of soap. Machinery of many types will be installed in large quantities. The Pyle land lies under water and the work of piling and filling in will begin at once. No details have been determined or architects or engineer selected.

YOUR INSURANCE

should be adapted to your circumstances, age and occupation.

If you need to emphasize Protection, you will buy a Life Policy.

If you wish to combine Savings and Investment with Insurance, you will buy an Endowment Policy.

If you are advanced in years and wish to be relieved from financial care, you will buy an Annuity Contract, assuring you an annual income for life.

If you are undecided as to the kind of Policy, or if you do not now feel able to carry the kind you think you want, THE PENN MUTUAL has a low premium Policy well suited to your case. This contract enables you to start your Insurance now and to have your payments credited on any other Policy you may wish to select later—the premium rate of the new Policy to be that of your present age.

PHILADELPHIA, WED'Y, JULY 20, 1904

THE CHARLES WARNER COMPANY TAKES ANOTHER AGENCY

The Diamond Stone Brick Company is rushing to completion its plant at Wilmington, Del., for the manufacture of sand-lime brick, and expects to begin operations within the next two or three weeks.

These brick are manufactured from the highest grade of silica sand and pure calcium lime. They will stand a crushing strain greater than any clay brick, and a greater degree of temperature; and the manufacturers guarantee a water absorption of less than twelve per cent. These brick improve with age in the atmosphere, or under water, and will not crack or disintegrate by freezing. They can be furnished of any shade or color desired. The natural color, however, is a beautiful soft gray, resembling Indiana limestone or sandstone.

The Charles Warner Company, of Philadelphia, Pa., and Wilmington, Del., will supply the raw materials for manufacturing the brick, and will have the general sales agency.

Delivery can be made by water to New York, Philadelphia, Trenton and Camden, N. J.; Baltimore, Washington, Norfolk and Portsmouth, and via rail to intermediate points.

ENTERPRISE

There has appeared in the columns of this journal from time to time advertisements of the Joseph Dixon Crucible Company, on Dixon's Silica Graphite Paint.

These advertisements have been cleverly written, and attractively displayed, setting forth the goods in a clean cut, comprehensive style, and showing the hand of a man who knows what good advertising is and how to do it.

This work is accredited to Mr. James G. Conner, who formed connections with the Dixon Company on March 1, this year.

Mr. Conner assumed charge of the paint department of this large concern at that date, there to direct matters in that line as well as to gain publicity for them through advertising.

He is a thorough and able paint man, having been associated with the trade for a number of years past.

Beside his paint knowledge Mr. Conner gained a wide experience in the Newspaper and advertising business through his connections with Philadelphia local papers as special real estate and building news reporter, gaining for himself in that capacity an enviable reputation. His connections with this important department of the Philadelphia dailies gave him a wide acquaintance among the leading architects and builders of this city.

Concerning his personality and make up, he might be slated as a good fellow. He has the happy faculty of making friends quickly, and holding them closely.

He is a good thinker, versatile and clever as a salesman, yet with his cleverness gains business through straight and honorable means.

Good and systematic business methods are strong points with him and these together with a complete knowledge of the paint business should soon make him a valuable addition to the Dixon Company.

It is an enterprising move on the part of the Dixon Company in securing a man of Mr. Conner's type, but then it is only history repeated—for every move they make is best for the "good of the cause," thanks to the good, keen foresight of their able manager, Mr. W. J. Coane.

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the re-

sults far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

W. L. Plack, architect, 1208 Chestnut street, has informed us that he has sent revised plans and specifications to the original builders for the \$100,000 Blair County Retreat, to be built at Hollidaysburg, Pa., and bids are due July 29.

Edwin F. Durange, 1200 Chestnut street, has completed plans and specifications and sent same to the committee for a new convent for the Misericordia, to be built at Merion, Pa., at a cost of \$100,000. After plans have been approved he will send the same out for estimates to local builders.

Ballinger & Perrot, architects and engineers, 1200 Chestnut street, will take revised bids on the proposed new plant for the Crane Ice Cream Company, to be built at Twenty-third and Mannings street (details previously noted), until July 29, according to revised plans and specifications prepared by them.

C. E. Schermerhorn, architect, 430 Walnut street, has completed plans and specifications for a pair of twin brick houses to be erected on Fisher's avenue, Olney, Phila., for Mr. C. H. Schaller. They will be three stories high and contain all modern improvements. Joseph Ashby and C. W. Cook will submit bids to the owner on July 28.

L. V. Boyd, architect, Harrison Building, has completed plans and specifications and sent same out to builders for estimates for a new residence for Allan Cowperthwait, Esq., to be built at St. David's, Pa. It will be two stories high and will be built of stone and shingle, with porch on front and side and all modern and up-to-date improvements. Bids due July 28. The following are bidding: McClintock & Weaver, P. McDevitt, M. N. Croll, Gray Bros., and J. D. Lingle.

Heacock & Hokanson, architects, 931 Chestnut street, have completed plans and specifications and sent same out to builders for estimates for an office building to be built at Norristown, Pa., for John Faber Miller, Esq. It will be two stories high, 38x50 feet, and will be built of Sawyer Fisher brick, Flemish bond, and have all modern and up-to-date improvements. Bids due August 1. The following are bidding: W. H. Shoffner & Bros., Philip R. Heavner, of Norristown, Pa.; Daniel McCook, of Flowertown; F. L. Hoover & Son, Wm. H. Eddlemen and King Killough & Co., of this city.

Charles W. Bolton and John W. Dull, associate architects, have been commissioned to prepare plans and specifications for a new edifice for the Presbyterian congregation of Roanoke, Va. To be one-story and basement high, and will be Gothic in design, and built of stone and will seat four hundred persons. It will be lighted by electricity, heated by steam, best plumbing work, all modern and up-to-date ecclesiastical furnishing. It is expected in a

short time that estimates will be invited. Also they have been commissioned to prepare plans for a handsome new church to be built at Hazleton, Pa., for the Reformed Episcopal church, of that place, being one-story and basement high, being built of brick and stone and will seat 600 persons. To be heated by steam, wired for electricity, with all modern up-to-date ecclesiastical furnishing.

BUILDING AND REAL ESTATE NOTES

As soon as the insurance has been adjusted on the losses caused by the recent fire at the Philadelphia Horse Show grounds, St. Martin's Green, Wissahickon Heights, they will be rebuilt.

Doyle & Doak, builders, 1509 Sansom street, have been awarded the contract to build the second and third story additions and make general interior improvements to the residence of Mrs. Hamilton Disston, at 1505 North Broad street, at a cost of \$10,000. Plans and specifications by Cope & Stewardson, architects, 320 Walnut street.

Thomas Little & Sons, builders, 1216 Ransdell street, has been awarded the contract to build the new clubhouse for the United Gas Improvement Company, at Point Breeze. It will be one-story high, measuring 16x84 feet, and will be built of brick, with all modern up-to-date improvements and conveniences, and is expected to cost in the neighborhood of \$30,000.

Frank E. Wallace, builder, De Long Building, has plans posted for a stable for Harvey D. Holloway, Esq., to be built at Gowen avenue and Sprague street, Mt. Airy, Phila. It will be two-story high, 55x44 ft, and will be built of brick with the usual sanitary stable appointments. Bids due July 28. Plans by Cope & Stewardson, architects, 320 Walnut street.

Cramp & Co., J. E. & A. L. Pennock, Chas Gilpin have revised plans posted for the proposed new \$125,000 high school to be built at Plainfield, N. J. It will be stone, three stories and basement high, with all the up-to-date appointments and conveniences. Bids due August 1. Plans and specifications by Hale & Morse, architects, Drexel Building.

Chas. Gilpin, builder, Pennsylvania Building, has filed bids with Architect John T. Windrim, 1107 Walnut street, for the handsome new residence to be built at 1725 Spruce street. It will be three stories high, 20x103 feet, and will be built of stone and brick. It will have every modern appointment and convenience. It is expected that the contract will be awarded in a few days.

Ramsey Bros. and Wilson, builders, office 237 Ramsey street, at Fifty-first and Arch streets, will erect an operation of 15 brick dwellings

on the north side of Spruce street east of Fifty-sixth street to Allison street. They will be three stories high and will have all modern improvements and will cost about \$80,000. Plans and specifications by C. E. Rahn, architect, 410 Walnut street.

Wm. Steele & Son, builders, 1600 Arch street, have been awarded the contract to build a \$75,000 factory for Thomas E. Brown, at Second and Westmoreland streets. It will be four stories high, with basement, 50x100 feet, and an office wing, 45x95 feet. It will be constructed of brick and slow burning construction and will have a tower fire escape, and all up-to-date appointments.

Kendrick & Roberts, 1211 Walnut street, have plans posted for a store building to be erected at 725-727-729 Arch street, for the Whiting Paper Company. It will be four stories high, of brick and slow burning construction, and will have a fire tower on the side. Plans and specifications by Amos W. Barnes, architect, 901 Walnut street. It is expected that the contract for this work will be awarded in a short time.

George W. Deaver, builder, of Lanerch, Pa., has been awarded the contract to build the four houses for A. Merritt Taylor, at Lanerch, Pa. They will be three stories high, 33x30 feet each, and will be built of stone and will have slate roof. The interior will be in chestnut finish. They will be wired for electricity, heated by hot air, best open plumbing work, and all modern and up-to-date appointments. It is estimated that this operation will cost \$25,000. Plans and specifications by Harry L. Reinhold, Jr., architect, 1004 Chestnut street.

Wm. R. Dougherty, builder, 1604 Sansom street, has been awarded the contract to remodel the property at the southwest corner of Twentieth and Chestnut streets, for Jacob F. Baer. Plans by Geo. Relfuss, architect, 1524 Chestnut street. He also has been awarded the contract to build the new clubhouse at 3641 Locust street, for Phi Kappa Psi. It will be four stories high, with basement, and will be built of red brick and stone, and will have the usual appointments (details previously noted). Plans by Frank A. Rommel and Francis A. Gugert, associate architects.

H. L. Norris, builder, of Chester, Pa., has been awarded the contract to build the new Fifth Presbyterian church, to be built at Chester, Pa., at a cost of \$10,000. To be one-story and basement high, built of stone, in the basement to have gymnasium, reading room, Sunday-school room etc. The first floor will contain auditorium, seating 500 persons. Plans and specifications were prepared by Charles W. Bolton, Witherspoon Building, Philadelphia. The work will be proceeded with in a few days.

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

T. Frank Miller, architect, 1126 Walnut street, has prepared plans and specifications and is now ready for sub-bids for two three-story stores to be built at 1016-18 Locust street. They will measure 16x31 feet each and will be built of brick with all modern improvements.

Pugh & Hubbard, architects and engineers, Real Estate Building, are working on plans and specification for a new residence for Mr. Hugh Stone to be built at Coatesville, Pa. It will be two and a half stories high, 30x40 feet, and will be Colonial in design and will be built of Sawyer-Fisher brick. It will have a porch on the front and sides and will have every modern improvement and convenience. Will be ready for bids in about two weeks.

McIlvaine & Roberts, architects, Land Title Building, have completed plans and specifications and sent same out to builders for estimates for the new Colonial residence of A. L. Register, Esq., to be built at Ardmore, Pa. It will be two and a half stories high, 32x65½ feet and will be built of brick. It will have porch front and side (details previously noted). Bids due August 8. Gray Bros., Metzger & Wells, H. Wolf and Frank Mahan are bidding.

Koelle, Speth & Co., architects, 608 Chestnut street, have completed plans and specifications and sent same out to builders for estimates for a new residence for Jos. Baumgartner to be built at Fillmore and Bulson streets, Camden, N. J. It will be three-stories high of brick and will measure 40x50 feet, with a servant wing and will have a porch on front. It will be heated by steam, wired for electricity and will have all up-to-date and modern improvements and conveniences. Bids due August 8. Frank Sweeney, builder, is estimating.

Rankin, Kellogg & Crane, architects, 1012 Walnut street, have completed plans and specifications and sent same out to builders for estimates for a clothing manufactory and storage building to be built at southwest corner of Broad street and Washington avenue for Assistant Quartermaster, Department of the United States Marine. It will be five-stories and basement high and will be fire-proof in its construction and will be built of brick, granite and terra cotta. The Cramp Co. and Lynch Bros. are bidding. Bids due August 18th.

C. E. Schermerhorn, architect, 430 Walnut street, has prepared plans for a three-story, 35x45 feet, stone residence and garage, to be located on the north side of Sixty-eighth avenue, between Twelfth and Thirteenth streets, Oak Lane, Philadelphia, for Mrs. Mary A. He has also prepared plans for a three-story and basement stone residence, 32x80 feet, to be located on the south side of Venango street above Nineteenth street for Mr. George H. Regar. House contains eight rooms. First floor has large reception hall and stair hall, reception room, library, dining room, serving room, kitchen and laundry. Basement has the feature of a large rathskeller. Interior finish of oak. Two bath rooms are provided with white marble floor and polished marble floor and polished marble sides, shower baths, etc. Exterior in stone with copper bays, cornices, green slate roof. Building wired for electric lighting, piped for hot water heating and gas, instantaneous hot water heating plant, provided in addition to modern filtering system.

BUILDING AND REAL ESTATE NOTES

Oakes & Tyas, builders, 146 North Seventh street, have submitted bid for a new residence to be built at Highland Park, Pa. It will be two and a half stories high of stone and frame and will have all modern improvements.

F. B. Davis, builder, 9 North Thirteenth street, has been awarded the contract to build new partitions and floors, also painting and plumbing at the Medical Laboratory and Dental Hall of the University of Pennsylvania, Thirty-sixth and Spruce streets. Work will proceed at once.

Harrison C. Rea, builder, 1815 Francis street, has been awarded the contract to build the new building for the Galilee Mission, at Vine and Darien streets. It will be four stories high with basement and will measure 32x85 feet and will be built of brick and stone and will have the usual appointments. The plans and specifications were prepared by Duhring, Okie & Ziegler, architects, South Penn Square Building.

Otto Domsen, electrical contractor, 2813 Germantown avenue, has been awarded the contracts for all electrical work on the following: German Lutheran Church, Clearfield and Emerald streets; station at Jenkintown for the Philadelphia & Reading Railway; two dwellings at Lawrence and Queen streets, Germantown, for H. B. Shoemaker & Co., and store and dwelling for Mrs. J. Rosener, at 2808 Germantown avenue.

Doyle & Doak, builders, 1509 Sansom street, have been awarded the contract to build the William L. Elkins Masonic Home for Girls, at Broad and Huntingdon streets. The plans provide for a building Colonial in design and it will be three-stories high with basement, with a wing on either side. It will measure 125x68 feet and the wings 36x107 feet. It will be built of brick and contain every appointment

and convenience. Plans by Horace Trumbauer, architect, Land Title Building.

Kendrick & Roberts, Inc., 1211 Walnut street, have plans posted for a one-story addition and improvements to the James Fenimore Cooper School at Burlington, N. J. Bids due August 6th. Also plans posted for alterations and a two-story stone addition to the Captain James Lawrence School, also at Burlington, N. J. Bids due same day. Plans for the above work were prepared by Hewett Bros., architects, Bullitt Building, Phila.

W. J. McShane, builder, 1517 South Thirteenth street, has been awarded the contract for the two-story addition, 22x22 feet, to the Sacristy of the Church of the Annunciation at Tenth and Dickinson streets and to erect a three-story addition and make alterations to the parochial residence of the same church at northeast corner of Tenth and Greenwich streets. The total cost is about \$525. The plans and specifications are by Watson & Huckel, architects, 1213 Walnut street.

Roydhouse, Arey & Co., builders, Fidelity Mutual Building, have plans posted for two large buildings to be erected on the Delaware River front below Dark Run Lane, near Wissinoming station of the Pennsylvania Railroad for the National Ammonia Company, of Pennsylvania. Plans call for a two-story storage house, 61x28 feet and a two-story office building, 48x24 feet. Both buildings will be of stone, brick and steel construction. Bids due August 8th. Plans and specifications by Kurt W. Peuckert, architect, 234 South Fourth street.

Members of the Board of Education are undecided as to the best available site for the new building for the Commercial High School for Girls for which \$350,000 has been set apart in the big loan. Some of the members favor the demolition of the old Boys' High School Building at Broad and Green streets and adjacent properties as a site. Others favor a different location altogether. Simon Gratz, Thomas E. Merchant and James Hughes, sub-committee, are engaged in the task of agreeing upon a site and recommending it to the Board for action.

P. W. Finn, builder at Altoona, Pa., has been awarded the contract to build the Blair County Retreat for the Insane at Hollidaysburg, Pa. The building will be two and a half story high and will measure 400x160 feet and will be constructed of reinforced concrete and will be fire-proof and up-to-date in all its improvements. His price was \$129,000. The proposed retreat will be located northeast of the present Almshouse. The plans and specifications were prepared by W. L. Plack, architect, 1208 Chestnut street, this city. Work will be done in eighteen months.

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

DYCKERHOFF PORTLAND CEMENT

E. THIELE, Sole Agent, 99 John Street, New York.

Made in Germany and used in the United States from more than twenty-five years. The high esteem in which it is held is due to its correct chemical composition, great strength and constant uniformity—perfections which have not been approached by any other cement.

ARCHITECTS' NOTES

Bailey & Bassett, architects, 421 Chestnut street, are working on plans and specifications for a handsome new residence to be built at Haverford, Pa., for Mr. Edward Sharwood. It will be three stories high, 45x30 feet, with kitchen wing 30x20 feet, and library wing 20x15 feet. It will be built of stone and frame, the interior in hardwood finish. It will have a porch on the front and side and will have every modern convenience and appointment. It will be some time before working drawings are ready.

It is reported that preliminary surveys are being made for the site for the hospital buildings on the land recently purchased by the State for a home for feeble minded and epileptics, near Spring City. They will be constructed of brick and stone, and every modern precaution will be taken to prevent accidents to the inmates. They will be fireproof in their construction, and will probably be four stories and basement high, and estimated to cost \$1,000,000. Plans and specifications are being prepared by Philip H. Johnson, architect and engineer, Land Title Building, Philadelphia.

Wilson, Harris & Richards, architects and engineers, Drexel Building, Philadelphia, have completed plans and specifications and invited bids for a handsome new passenger station to be built at Charleston, W. Va., for the Chesapeake and Ohio Railroad. It will be two stories high, measuring 66x40 feet, and will be built of stone and terra-cotta. It will have baggage room on the side with a platform extending all around the station. The first floor will contain ladies' and gents' waiting room, ticket office, etc. The upper floors of the station, living quarters. It is calculated that this station will cost \$60,000. All bids are to be sent to F. S. Scarborough, maintenance of way, J. E. & A. L. Pennock, of this city, are bidding.

Ballinger & Perrot, architects and engineers, 1200 Chestnut street, have completed plans and specifications for a new shirt manufactory, to be erected at Pottsville, Pa., for M. Phillips & Son. The building will be four stories high, 54x123 feet, and will be of slow burning brick construction. It will have brick enclosed stairway, elevator shaft and fire escapes. It will be modern and up-to-date in its construction. The following are bidding: King, Killough & Co., Kendrick & Roberts, Inc., of this city; L. F. Pocht, Beard & Co., of Reading, Pa.; Weaver & Son, Tamaqua, Pa.; J. W. Ferguson, Paterson, N. J.; Jos. Nagle & Son, Allentown, Pa.; L. S. Medler, Philip Kreis, Samuel Deitrich, S. E. Argood, Jas. Heffner & Son, of Pottsville, Pa. Bids due August 16.

C. E. Schermerhorn, architect, 430 Walnut street, has completed plans and specifications and sent same out to builders for a new house and garage, to be built at the north side of

Sixty-eighth avenue between Twelfth and Thirtieth streets, Oak Lane, Phila., for Mrs. Mary A. Clapp. The house will measure 32x44 feet, and will be three stories high and will be built of stone. The interior will be finished in oak and chestnut finish. It will be heated by hot water, with tile work and all modern and up-to-date appointments. Bids due August 11. The following builders have been invited to bid: W. B. L. Wall, Hill & Stevens, Oak Lane; Jos. Ashby, Fox Chase, Phila.; D. W. Sperry, Burd P. Evans and M. C. Warren, of this city.

Ballinger & Perrot, architects and engineers, 1200 Chestnut street, are working on plans and specifications for manufacturing and power plants for the Victor Talking Machine Company, at Front and Cooper streets, Camden, N. J. The manufacturing plant will be four stories high, measuring 70x170 feet. The power house will be two stories high, measuring 60x80 feet. The manufacturing plant as well as the power plant will be fireproof in its construction, providing for fire towers, elevators, etc. The power house has been constructed to take the most modern and up-to-date machinery. It is calculated that in this power house a 900 H. P. engine will be installed. On the second floor will be a boiler room. It is expected that in a short time bids will be invited.

They also have completed plans and specifications for the reconstruction of the building at the northwest corner of Fourth and Locust streets, for the Review Publishing and Printing Company. The building is four stories high, with basement and it will be built of the reinforced concrete construction, and will be fireproof throughout. It will have a brick tower fire escape and elevator shaft. The bids are due August 10. The following builders have been invited to bid: A. Raymond Raff, Wm. R. Brown, Appleton & Burrell and Henderson & Co. The same firm has completed plans and specifications for Sunday-school addition to St. Luke's Methodist Episcopal church, at Broad and Jackson streets. The bids are due August 17. The following builders have been invited to bid: Geo. F. Payne & Co., F. L. Hoover & Son, Inc., A. H. Williams & Son, Harry Brockelhurst, Wm. Christy & Son, Burd P. Evans, Appleton & Burrell, A. Raymond Raff.

Delano & Alderich, architects, of New York City, have completed plans and specifications and sent same to Stacy Reeves & Sons, of this city, for the future home of the Philadelphia Orphans' Asylum, to be built at Wallingsford, Pa. The plans provide for a group of four buildings to be erected on the large tract of land recently purchased for that purpose. The ground provides for ample buildings, and they are so constructed that they will be surrounded by a square court, and when com-

pleted will look like the letter U. The main structure will be four stories high, with basement, with two wings, which will be two-and-a-half stories high. They will be fireproof in their construction. Every care has been exercised to make them the most up-to-date and modern in their construction. Particular care has been given to make exits in case of fire. Interior finish of the building will be in hardwood, and the design is Colonial. Bids are due August 15th.

BUILDING AND REAL ESTATE NOTES

Seward L. Bowser, builder, Witherspoon Building, has been awarded the contract to build the handsome new residence on the south side of Venango above Nineteenth street, for Mr. George H. Regar. It will be three stories high and will contain 13 rooms, with all modern improvements and conveniences. Plans and specifications by C. E. Schermerhorn, architect, 430 Walnut street.

Wells Bros. Company, R. M. Peterson, A. Raymond Raff, The Chas. McCall Company, Henderson & Co., Ltd., P. J. Hurley and William Steele & Son have been added to the list of original builders for the proposed storehouse to be built at Broad and Washington avenue, for the United States Marine, according to the plans and specifications of Rankin, Kellogg & Crane, architects, 1012 Walnut street. Bids due August 18.

Harry Schmitt, 817 Indiana avenue, has broke ground for an operation of 82 houses, to be built at 6th and Tabor road. They will be two and three stories high, and will measure 16x56 feet, and built on lots measuring 20x100 feet each. Will be built of brick and stone, porch front, and will be erected on Fifth street, Tabor road, Somerville avenue and Lawrence street. It is estimated that this operation will cost \$400,000.

J. S. Rodgers Co., of Stanwick, N. J., has been awarded the contract to build the new edifice at Merchantville, N. J., for the First Baptist congregation at Merchantville, N. J. It will be one story and basement high, built of brick and stone, and will contain all the up-to-date ecclesiastical furnishings. The plans and specifications have been prepared by Arnold H. Moses, architect, 136 South Fourth street. Work will proceed at once.

It is reported that the West Chester Traction Company contemplate building an extension to its line from Sixty-third and Market streets, to Upper Darby, Garrettsford, Burnely track, Jones Meadows, over the hills to Oak Hill, across Darby Creek to Clifton Heights and then to Darby. The distance is over 15 miles and it is expected that operation will soon be started. Of course, this will involve new power houses, tracks, and other necessary appointments of a trolley line.

DEAR SIR: I WILL CONTRACT to heat your residence, however large or small, with **HOT WATER**, and file a Trust Company's bond for ten times the cost, the same to be forfeited if I fail in any direction.

This means that there shall be more than enough radiation at the smallest possible cost for coal. No leaks, no mistakes, no annoyances of any kind. The boiler to be of the best make.

The responsibility all mine, and the cost no greater because of good work and material.

Yours Truly,

JOHN C. F. TRACHSEL,

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior.

We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

Koelle & Speth, architects and engineers, 608 Chestnut street, are working on plans for a road house, to be built at Washington Park, Twenty-sixth and Allegheny avenue, for Emil Genenger, owner. It will be of brick, two stories high, measuring 20x80 feet.

W. W. Potter, architect, 1012 Walnut street, has invited estimates from P. J. Hurley and I. N. Flounder, builders, for the alterations and additions to the residence of Geo. T. Butler, at Media, Pa., according to the plans and specifications prepared by him. Bids due August 20.

W. C. Pritchett, architect, 430 Walnut street, is working on plans for a handsome new residence for Mr. Horace Keesey, to be built at York, Pa. It will be three stories high, 70x40 feet, and will be built of stone. It will have hardwood on the interior and will have all modern improvements. It will be some time before plans are ready for bids.

Edwin F. Durang, architect, 1200 Chestnut street, is working on plans and specifications for an \$85,000 chapel and auditorium to be built at Merion, Pa., for the Sisters of Mercy, it will be two stories high, 150x200 feet, and will be built of stone. The auditorium will be on the first floor with chapel on the second floor. It will be some time before plans are ready for bids.

Carl P. Berger, architect, South Penn Square Building, will send plans and specifications out for bids the early part of next week, for alterations and additions to the residence of Mr. Wm. A. Rump. Plans provide for a new back building three stories high, of brick, and general interior improvements. There will be two new bathrooms, of tile, new steam heating plant and hardwood on the interior, etc.

H. L. Reinhold, Jr., architect, 1004 Chestnut street, is working on plans and specifications for new residence to be built at Ardmore, Pa., for Mr. H. McDevitt, to be two-and-a-half stories high, to be built of brick and frame, and half timber, of shingle roof, porch on the front. The interior will be finished in hardwood and will contain sixteen rooms, heated by hot water, with all modern improvements.

Herbert C. Wise, architect, 1012 Walnut street, has completed plans and specifications and invited bids for alterations and additions to the residence of Alba B. Johnson, Esq., at Rosemont, Pa. Plans provide for the building of two additional wings and general interior improvements. Bids due August 24. The following are bidding: R. C. Ballinger & Co., Jacob Myers & Son, Roydhouse, Arey Company and Grays Bros.

Newman & Harris, architects, Land Title Building, have completed plans and specifications for a new summer residence to be built at Spring Lake, N. J., for Mr. S. Heilner. It

will be stone and frame, two stories high, porch on front, with all modern improvements. The following builders are bidding: R. C. Ballinger & Co., D. W. Sperry, Thomas H. Seeds, Jr., W. A. Borden, W. N. Morris and H. Moore.

Amos W. Barnes, architect and engineer, 901 Walnut street, has completed plans and specifications for a chapel to be built at Conshohocken, Pa., for St. Mary's Polish Catholic church of the Immaculate Conception. The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior. We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

Stearns & Castor, architects, Stephen Girard Building, are working on plans for a stable to be built at Amber, Abigail and Dreer streets, this city, for R. Harbison, 2046 Amber street. It will be constructed of brick and will have all the up-to-date sanitary stable appliances. The owner will take bids about the first week in September.

Westley Leshier Blithe, architect, 14 South Broad street, will invite estimates soon for a handsome new residence to be built at Llanerch, Pa., for Dr. I. B. Roberts. It will be three stories high, of stone and frame, and will have a porch on the front and side. The interior will be in hardwood finish, with every modern convenience. It is estimated to cost about \$6,500.

Heacock & Hokanson, architects, 931 Chestnut street, have completed plans and specifications for a two-and-a-half-story brick and pebble-dashed residence, measuring 34x51 feet, to be erected at Jenkintown, Pa., for Samuel High. Bids due August 26. The following are bidding: D. W. Sperry, F. L. Hoover & Son, W. J. Stevens, F. B. Davies, S. D. Carson, G. W. Sperry and E. Lever, Jr.

Milligan & Webber, architects, 520 Walnut street, have completed plans and specifications and sent same to the owner, who will take bids for a rectifying plant for Mr. Cartan, of 407 South street, and to be built at 316 Lombard street. It will be four stories high and will be built of brick and slow burning construction. Bids due August 27. P. J. Hurley and Lynch Bros., builders, are bidding.

Heacock & Hokanson, architects, 931 Chestnut street, have completed plans and specifications for a new residence to be built at Glenside, Pa., for George Fresholt. It will be two-and-a-half stories high, and will be built of stone and frame. It will have a porch on the front, the interior will be in hardwood finish, and it will have every modern convenience and appointment. Bids due August 26. D. W. Sperry, F. L. Hoover & Sons, Inc., F. B. Davies, of this city, and G. W. Sperry, of Jenkintown, Pa., and W. E. Hauser, of Glenside, Pa., are bidding.

Ballinger & Perrot, architects and engineers, have completed plans and specifications for alterations and additions to the manufacturing plant of Jacob Gerhardt, at Hazleton, Pa. The additions will be three stories high, 33x76 feet, and will be built of brick and slow burning construction and will have all modern improvements. It is expected that working drawings will be sent out the latter part of this week.

Wilson Eyre, Jr., architect, 927 Chestnut street, is working on plans for a handsome new residence for Sharswood Brinton, Esq., to be built at St. David's, Pa. It will be three

stories high and will be built of stone and will have every modern appointment and convenience.

BUILDING AND REAL ESTATE NOTES

Kendrick & Roberts, Inc., of this city, submitted the lowest figures in the bids for the construction of a storehouse, quartermaster's office and supply, at Broad and Washington avenue, for the United States Marine Corps. Their bid being \$70,777.

Scott & Kriebel, builders, Mutual Life Building, have plans posted for alterations and additions to the residence of Robert Lea Perot, owner and architect, at 505 Hansberry street, Germantown. Mr. Perot's office is in the Bailey, Banks & Biddle Building.

Rhoads Shee, owner and builder, 641 Arch street, is taking sub-bids for an operation of 36 residences, to be built at Sixtieth and Osage avenue, West Philadelphia. They will be two stories high, 18x40 feet, and will be built of brick, with all modern improvements.

The 20th Century Hot Air Radiator System of Heating

MORE efficient and more reliable than hot water or steam, with the cost of installation one-half. The radiators are made of sheet steel, and can be set in any desired part of the room without cutting carpets or holes in floors. They can be decorated to conform to the room decorations; no iron pipes and valves coming up through the floors to leak and cause annoyance and destruction. The hot air from the furnace, located in the cellar, passes through the radiators in each room, giving an even and delightful temperature, without dust, smell or odor of coal gas, or any of the other numerous bad features of registers, hot water or steam. The circulation of the hot air through the 20TH CENTURY HOT AIR RADIATOR is perfect and constant, is always under absolute control and the heat can be regulated in each room. Any make of furnace, new or old, if efficient, can be used. The cost of installation is much less, and the economy of fuel much greater than in the best of hot water or steam heating systems, and the results far superior.

We are now prepared to install complete THE 20TH CENTURY HOT AIR RADIATOR SYSTEM in new or old houses under our guarantee as to its efficiency. Advise location and size of property, when estimates on the cost of installation will be furnished without charge.

WOODS' STEEL CORNER

It is a patented steel strip that is fastened to lath, or other construction, on projecting corners, is embedded in the plaster and prevents it chipping. It does a great deal more, but our book, "Just Around the Corner," tells the rest. Send for it. A sample, too, for the asking. It costs less to put Woods' Steel Corner in a building than to keep the corners repaired.

ARCHITECTS' NOTES

A number of architects have been invited by the commissioners of Cheltenham township to submit plans in competition for the proposed \$50,000 high school.

M. A. Lehman, architect, 2033 Oxford street, will send out revised plans for bids for the new church at Twenty-first and Tasker streets, for the Bethel Reformed congregation. It will be built of brick and stone, with all the usual church furnishings.

H. L. Reinhold, Jr., architect, 1004 Chestnut street, has completed plans for a Colonial stable to be built at Wayne, Pa., for Mr. Charles Schaeffer. It will be one-and-a-half stories high, 35x30 feet, and will be built of stone, with sanitary appointments.

Peabody & Stearns, architects, Boston, Mass., are working on plans for a \$500,000 house and stable to be built on McCalmum street, Chestnut Hill, Phila., for Dr. Woodward. Landscape gardeners are now engaged laying out the grounds, making out walks, etc.

Peter Kuhn, architect, Frez Building, 1015 Diamond street, has completed plans and invited estimates for a store and residence to be built at Frankford, Phila., the exact location withheld. It will be two stories high, of brick, and will have all modern improvements.

Seymour & Paul Davis, architects, 907 Walnut street, have completed plans for a new fifty-room hotel to be built at State College, Pa. It will be three stories high, of brick and will have all modern improvements. Bids due September 8. The owner, Prof. Geo. C. Butz, of that place, is taking estimates.

Carl P. Berger, architect, Free Penn Square Building, is working on preliminary plans for a church and Sunday-school to be built at Park avenue, Westmoreland street, and Rising Sun Lane, for the Tioga Reformed congregation. It will be two stories and basement high, and will be built of stone. Details later.

Ballinger & Perrot, architects and engineers, 1200 Chestnut street, have completed plans and invited estimates for the three-story addition, measuring 33x76 feet, to the shirt factory of Jacob Gerhart (details previously noted), at Hazleton, Pa. James Schmitt, of Wilkesbarre, Pa.; S. Y. Frederick, Frederick May and P. F. Boyle, of Hazleton, Pa., builders, are bidding.

Wilson, Harris & Richards, architects and engineers, Drexel Building, have completed plans and specifications and sent same to the owner, F. P. Buckley, office in the Lippincott Building, who is taking bids for a new residence to be built at Broad and Loudon streets. It will be built of brick, two-and-a-half stories high, 32x49 feet, and will have all improvements.
